The Multilingual Lexicon Jasone Cenoz,Britta Hufeisen,U. Jessner,2003-08-31 This volume is a response both to the increasing interest in multilingual phenomena and lexical issues in language learning It is of interest to scholars and graduate students interested in bi and multilingualism second and multiple language acquisition language processing and language learning mental lexicon applied linguistics psycho and neurolinguistics and language teaching Recent research on third language acquisition and trilingualism has made clear that most multilingual studies actually deal with vocabulary learning or the lexicon So far books on the mental lexicon have mainly been concerned with two languages in contact This book is unique because it explores the multilingual lexicon by providing insights from research studies conducted in psycholinguistics applied linguistics and neurolinguistics It goes beyond the use of two languages and thus concentrates on a new and developing area in linguistic research The different perspectives included in this volume provide a link to the mainstream work on the lexicon and vocabulary acquisition and will stimulate further debate in these areas and in the study of multilingualism   **The multilingual lexicon. An overview of research** ,2018-03-08 Seminar paper from the year 2017 in the subject English Language and Literature Studies Linguistics grade 1 University of Innsbruck language English abstract This paper presents an overview of research on the multilingual lexicon as well as the highly complex storage of words in the multilingual mind Furthermore it deals with word recognition processes and discusses the issue of a language selective versus language nonselective access The second part of this paper is concerned with the various ways in which different languages are interconnected and influence each other Based on this the phenomenon of codeswitching is illustrated as a widespread example of crosslinguistic interaction in the multilingual lexicon This paper aims at presenting an overview of the complex characteristics of the multilingual lexicon It should also give an idea of the immense amount of linguistic knowledge that is stored and processed within the multilingual mind and most importantly emphasize the significant linguistic awareness and cognitive skills that multilinguals display   Multilingual Lexical Recognition in the Mental Lexicon of Third Language Users Weronika Szubko-Sitarek,2014-10-07 The monograph constitutes an attempt to demonstrate that trilinguals should be considered as learners and speakers in their own right as opposed to L2 learners with a view to enumerating consequences this would bring to third or additional language teaching Its theoretical part offers an insight into the structure of the multilingual mental lexicon which is a product of the interplay of a whole array of cross linguistic factors in the minds of multilingual speakers The empirical part reports the findings of an empirical study which aimed to investigate connections which are formed between multiple languages in a multilingual mind All the aspects analyzed in the experiments are part of a broader question of how multilinguals make their lexical decisions and more specifically how they recognize words from different languages The book closes with the discussion of the role of the obtained results for multilingual didactics as well as some possible areas for future research   *Cross-linguistic Influences in the Second Language Lexicon* Janusz
