Media Strategies for Marketing Places in Crisis Eli Avraham, Eran Ketter, 2012-05-31 Growing competition between countries and cities over attracting infrastructure investment tourists capital and national and international status mean that today a negative image is more harmful than ever Whatever the cause of the negative image places perceived as dangerous frightening or boring are at a distinct disadvantage Many decision makers and marketers stand by helplessly frustrated by their knowledge that in most cases their city s negative image is not based on well grounded facts Given that stereotypes are not easily changed or dismissed the challenge facing these decision makers is great Analyses of many case studies show

interesting examples of places that tried to change a negative image into a positive one in order to bringing back tourists investors and residents Although a great deal of knowledge about crisis communications has accumulated in recent years very little has been written about strategies to improve places negative images. The aim of Media Strategies for Marketing Places in Crisis is to discuss the various dimensions of an image crisis and different strategies to overcome it both in practice and theory Media Strategies for Marketing Places in Crisis is based on the careful analysis of dozens of case studies advertisements public relations campaigns press releases academic articles news articles and the websites of cities countries and tourist destinations Environmental Management of the Media Pietari Kääpä, 2018-05-23 In recent years the widely held misconception of the media as an ephemeral industry has been challenged by research on the industry s significant material footprint Despite this material turn no systematic study of this sector has been conducted in ways that considers the role of the media industries as consumers and users of a range of natural resources Filling this gap Environmental Management of the Media discusses the environmental management of the media industries in the UK and the Nordic countries These Nordic countries both as a set of small nations and as a regional constellation are frequently perceived as some of the greenest in the world yet not only is the footprint of the media industries practically ignored in academic research but the very real stakes of the industries global impact are not comprehensively understood Here the author focuses on four key areas for investigating the material impact of Nordic media 1 resources used for production and dissemination 2 regulation of the media 3 organizational management and 4 labour practices By adopting an interdisciplinary perspective that combines ecocritical analysis with interrogation of the political economy of the creative industries K p argues that taking the industries to task on their environmental footprint is a multilevel resource and organizational management issue that must be addressed more effectively in contemporary media studies. This book will be of great interest to students and scholars of media communication and environmental studies Classification of instructional programs 2000 edition. Images in Social Media Susanne Ørnager, Haakon Lund, 2022-06-01 This book focuses on the methodologies organization and communication of digital image collection research that utilizes social media content Image is here understood as a cultural conventional and commercial stock photo representation The lecture offers expert views that provide different interpretations of images and their potential implementations Linguistic and semiotic methodologies as well as eye tracking research are employed to both analyze images and comprehend how humans consider them including which salient features generally attract viewers attention This literature review covers image specifically photographic research since 2005 when major social media platforms emerged A citation analysis includes an overview of co citation maps that demonstrate the nexus of image research literature and the journals in which they appear Eye tracking tests whether scholarly templates focus on the proper features of an image such as people objects time etc and if a prescribed theme affects the eye movements of the observer The results may point to renewed requirements for building image search engines As it stands

image management already requires new algorithms and a new understanding that involves text recognition and very large database processing The aim of this book is to present different image research areas and demonstrate the challenges image research faces The book s scope is by necessity far from comprehensive since the field of digital image research does not cover fake news image manipulation mobile photos etc these issues are very complex and need a publication of their own This book should primarily be useful for students in library and information science psychology and computer science

Cross-Media Service Delivery Diomidis Spinellis,2012-12-06 The digitisation of traditional media formats such as text images video and sound provides us with the ability to store process and transport content in a uniform way This has led the formerly distinct industries of media telecommunications and information technology to converge Cross media publishing and service delivery are important new trends emerging in the content industry landscape Mass media organizations and content providers traditionally targeted content production towards a single delivery channel However recent economic and technological changes in the industry led content providers to extend their brands to cover multiple delivery channels Following the content industry trend to create once and publish everywhere COPE a number of architectures technologies and tools are currently being developed and deployed to facilitate the automatic conversion of content to multiple formats

and the creation of innovative multi platform services This new approach enables the seamless access to information over different network infrastructures and client platforms This work aims to bring together a cross disciplinary core of contributors to address the technical and business issues of cross media publishing and service delivery. The volume is based on papers presented at the conference on Cross Media Service Delivery CMSD 2003 that took place in Santorini Greece in May 2003 Each contribution was reviewed by at least two reviewers typically three From the 30 papers that were submitted 20 were selected for presentation at the conference Those were further shepherded by programme committee members to be improved according to the review suggestions Policing and Media Murray Lee, Alyce McGovern, 2013-11-26 This book examines the relationship between police media and the public and analyses the shifting techniques and technologies through which they communicate In a critical discussion of contemporary and emerging modes of mediatized police work Lee and McGovern demonstrate how the police engage with the public through a fluid and quickly expanding assemblage of communications and information technologies Policing and Media explores the rationalities that are driving police media relations and asks how these relationships differ or not from the ways they have operated historically what new technologies are influencing and being deployed by policing organizations and police public relations professionals and why how operational policing is shaping and being shaped by new technologies of communication and what forms of resistance are evident to the manufacture of preferred images of police The authors suggest that new forms of simulated and hyper real policing using platforms such as social media and reality television are increasingly positioning police organisations as media organisations and in some cases enabling police to bypass the traditional media altogether The book is informed by empirical research spanning ten years in this field and includes chapters on journalism and police policing and social media policing and reality television and policing resistances It will be of interest to those researching and teaching in the fields of Criminology Policing and Media as well as police and media professionals Health Informatics Michael R. Kidd, Sebastian Garde, Carola Hullin Lucay Cossio, 2010-02-15 The field of health informatics or medical informatics as it is sometimes called is still a relatively young one compared to other areas of biomedicine and the health sciences Nevertheless its impact on the quality and efficiency of healthcare is crucial This second extensively revised and updated edition of Health Informatics An Overview includes new topics which address contemporary issues and challenges and shift the focus on the health problem space towards a computer perspective An overview is provided of the health informatics discipline and the book is suitable for use as a basic text in both undergraduate and postgraduate curricula Preparing students for practice as health professionals in any discipline it deliberately avoids focusing on any one speciality. The publication is divided into six sections an overview basic concepts applications supporting clinical practice service delivery management and clinical research and education With contributions from many distinguished authors this book is a valuable resource for healthcare professionals and students of health informatics alike
