Multimedia Environmental Management:

Multimedia Environmental Management J. Andy Soesilo, William D. Wiley, 1999 Authors Soesilo and Wiley explore and support the argument that effective environmental management must be based on a multimedia approach which focuses simultaneously on air water and waste and enables managers to assess the resulting financial operation and management benefits Within four sections The Role of Environmental Management Environmental Aspects of Business Operation Environmental Processes and Environmental Management Trends the authors highlight the development of modern environmental management and provide an overview of federal laws pertinent to multimedia environmental management

Environmental Management of the Media Pietari Kääpä, 2018-05-23 In recent years the widely held misconception of the media as an ephemeral industry has been challenged by research on the industry's significant material footprint Despite this material turn no systematic study of this sector has been conducted in ways that considers the role of the media industries as consumers and users of a range of natural resources Filling this gap *Environmental Management of the Media* discusses the environmental management of the media industries in the UK and the Nordic countries These Nordic countries both as a set of small nations and as a regional constellation are frequently perceived as some of the greenest in the world yet not only is the footprint of the media industries practically ignored in academic research but the very real stakes of the industries global impact are not comprehensively understood Here the author focuses on four key areas for investigating the material impact of Nordic media 1 resources used for production and dissemination 2 regulation of the media 3 organizational management and 4 labour practices By adopting an interdisciplinary perspective that combines ecocritical analysis with interrogation of the political economy of the creative industries K p argues that taking the industries to task on their environmental footprint is a multilevel resource and organizational management issue that must be addressed more effectively in contemporary media studies This book will be of great interest to students and scholars of media communication and environmental studies

Pollutants in a Multimedia Environment Yoram Cohen, 2012-12-06 Pollutants released to the environment are distributed among the many environmental media such as air water soil and vegetation as the result of complex physical chemical and biological processes The possible environmental impact associated with chemical pollutants is related to their concentration levels and persistence in the various environmental compartments Therefore information regarding the migration of pollutants across environmental phase boundaries eg air water soil water and their accumulation in the environment is essential if we are to assess the potential environmental impact and the associated risks In recent years it has become apparent that environmental pollution is a multimedia problem Risk assessment and the design of appropriate pollution control measures require that we carefully consider the transport and accumulation of pollutants in the environment We are now recognizing that the environment must be considered as a whole and the scientific and regulatory approaches must consider the interactions of environmental media It is also becoming apparent that single medium

approaches are partial and often counter productive On the other hand any multimedia program must carefully consider the rate of each environmental medium in the overall multimedia scheme
