Multimodal Psychoanalytically Informed Treatment Of Complex Dissociative Disorders

Paul Cundy, Golan Shahar

Multimodal Psychoanalytically Informed Treatment Of Complex Dissociative Disorders:

Multimodal Psychoanalytically Informed Treatment of Complex Dissociative Disorders Richard A. Chefetz, 2000-05 **Shame Matters** Orit Badouk Epstein, 2021-09-29 Winner of the 2022 Grady Award for Best Edited Book Understanding shame as a relational problem Shame Matters explores how people with support can gradually move away from the relentless cycle of shame and find new and more satisfying ways of relating Orit Badouk Epstein brings together experts from across the world to explore different aspects of shame from an attachment perspective The impact of racism and socio economic factors on the development and experience of shame are discussed and illustrated with clinical narratives Drawing upon the experience of infant researchers trauma experts and therapists using somatic interventions Shame Matters explores and develops understanding of the shameful deflections encountered in the consulting room and describes how new and empowered ways of relating can be nurtured The book also details attachment informed research into the experience of shame and outlines how it can be applied to clinical practice Shame Matters will be an invaluable companion for psychotherapists clinical psychologists counsellors social workers nurses and others in the helping professions

Psychotherapie der dissoziativen Störungen Luise Reddemann, Arne Hofmann, Ursula Gast, 2011-09-07 Darstellung s
ntlicher Therapieverfahren in der Behandlung von Dissoziativen Störungen Beschreibung der Psychotherapien an
praktischen Behandlungssituationen Störungen orientiert Klar strukturierte Behandlungskonzepte und praxisorientierte
Hinweise zur Auswahl des optimalen therapeutischen Vorgehens Jetzt komplett bearbeitet und aktualisiert **The
Handbook of Trauma-Transformative Practice** Joe Tucci, Janise Mitchell, Stephen W. Porges, Edward C
Tronick, 2024-02-21 The definitive Handbook of Trauma Transformative Practice brings together the work of leading
international trauma experts to provide a detailed overview of trauma informed practice and intervention its history the
latest frameworks for practice and an inspiring vision for future trauma transformative practice The Handbook is
interdisciplinary incorporating trauma research interpersonal neuroscience the historical and continuing experiences of
victims and survivors and insights from practitioners It addresses a range of current issues spanning polyvagal theory the
social brain oxytocin and the healing power of love and the neuropsychological roots of shame It also considers trauma
through the lens of communities with chapters on healing inter transgenerational trauma and building communities capacity
to end interpersonal violence Furthermore the Handbook makes the case for a new way of thinking about trauma trauma
transformative practice One which is founded on the principle of working with the whole person and as part of a network of
relationships rather than focusing on symptoms to improve practice healing and recovery **Multimodal Treatment of
Complex Dissociative Disorders** Richard A. Chefetz, 2000 **Neurobiology and Treatment of Traumatic Dissociation**
Ulrich F. Lanius, Sandra L. Paulsen, Frank M. Corrigan, 2014-05-13 Encompassing the contributions of expert clinicians and
researchers in the area of traumatic stress and dissociation this volume is the first to integrate current neuroscience

research regarding traumatic dissociation with several cutting edge approaches to treatment providing a comprehensive neurobiologically based treatment approach The text discusses current neuroscientific research regarding traumatic stress and dissociation that includes attachment affective neuroscience polyvagal theory structural dissociation and information processing theory yielding a comprehensive model that guides treatment and clinical interventions for traumatic dissociation It then integrates this model with stage oriented treatment and current therapeutic interventions including EMDR somatic and body psychotherapy approaches Ego State Therapy and adjunctive pharmacological interventions Readers are given hands on practical guidance regarding clinical decision making enabling them to make sound choices about interventions that will facilitate optimal treatment outcomes Key Features Provides a broad based treatment approach to traumatic stress syndromes and dissociation Offers accessible current research in the basic neurosciences relevant to our understanding of attachment traumatic stress and dissociation Includes practical suggestions for integrating EMDR somatic and body psychotherapy approaches with Ego State Therapy and adjunctive pharmacological interventions Integrates concepts from the affective and cognitive neurosciences and the study of consciousness Presents a comprehensive neurobiological model that accounts for the therapeutic effects of both somatic therapies and EMDR as well as adjunctive pharmacological interventions

Multimodal Treatment of Complex Dissociative Disorders Richard A. Chefetz,2000 **The Dissociative Mind in Psychoanalysis** Elizabeth Howell,Sheldon Itzkowitz,2016-02-05 The Dissociative Mind in Psychoanalysis Understanding and Working With Trauma is an invaluable and cutting edge resource providing the current theory practice and research on trauma and dissociation within psychoanalysis Elizabeth Howell and Sheldon Itzkowitz bring together experts in the field of dissociation and psychoanalysis providing a comprehensive and forward looking overview of the current thinking on trauma and dissociation The volume contains articles on the history of concepts of trauma and dissociation the linkage of complex trauma and dissociative problems in living different modalities of treatment and theoretical approaches based on a new understanding of this linkage as well as reviews of important new research Overarching all of these is a clear explanation of how pathological dissociation is caused by trauma and how this affects psychological organization concepts which have often been largely misunderstood The Dissociative Mind in Psychoanalysis will be essential reading for psychoanalysts psychoanalytically oriented psychotherapists trauma therapists and students

Understanding and Treating Dissociative Identity Disorder Elizabeth F. Howell,2011-06 Building on the comprehensive theoretical model of dissociation elegantly developed in The Dissociative Mind Elizabeth Howell makes another invaluable contribution to the clinical understanding of dissociative states with Understanding and Treating Dissociative Identity Disorder Howell working within the realm of relational psychoanalysis explicates a multifaceted approach to the treatment of this fascinating yet often misunderstood condition which involves the partitioning of the personality into part selves that remain unaware of one another usually the result of severely traumatic experiences Howell begins with an explication of

dissociation theory and research that includes the dynamic unconscious trauma theory attachment and neuroscience She then discusses the identification and diagnosis of Dissociative Identity Disorder DID before moving on to outline a phase oriented treatment plan which includes facilitating a multileveled co constructed therapeutic relationship emphasizing the multiplicity of transferences countertransferences and kinds of potential enactments She then expands the treatment possibilities to include dreamwork before moving on to discuss the risks involved in the treatment of DID and how to mitigate them All concepts and technical approaches are permeated with rich clinical examples

Treating Dissociative and Personality Disorders Antonella Ivaldi, 2016-05-26 Treating Dissociative and Personality Disorders draws on major theorists and the very latest research to help formulate and introduce the Relational Multi Motivational Therapeutic Approach REMOTA a new model for treating such patients within a clinical psychoanalytic setting Supported by her fellow contributors Antonella Ivaldi provides an overview of existing theories and evidence for their effectiveness in practice sets out her own theory in detail and provides rich clinical detail to demonstrate the advantages of the REMOTA model as applied in a clinical setting The narratives in this book show how it is possible to integrate different contributions within a multidimensional aetiopathogenic treatment model which considers the mind as a manifestation of the relationship between body and world From a conceptual perspective according to which consciousness emerges and develops in the interpersonal dimension this book shows how it becomes possible to understand in the therapeutic space what stands in the way of sound personal functioning and how to create the conditions for improving this Treating Dissociative and Personality Disorders will be highly useful in addressing the particular clusters of symptoms presented by patients stimulating therapists of different backgrounds to explore the complexity of human nature On reading this book it will become clear that theories can truly become useful instruments if approached with a critical mind and with humbleness in order to venture into what we do not know and will never know completely the relationship with the other unique and irreplaceable Treating Dissociative and Personality Disorders provides an integrative and comparative new approach that will be indispensable for combining relational clinical knowing and motivational theories It will appeal to psychoanalysts and psychotherapists especially those in training clinicians of different backgrounds interested in comparative psychotherapy as well as social workers and graduate and postgraduate students

The Dissociative Mind Elizabeth F. Howell, 2005 First Published in 2008 Routledge is an imprint of Taylor Francis an informa company

Trauma, Dissociation, and Multiplicity Valerie Sinason, 2012 Trauma Dissociation and Multiplicity provides psychoanalytic insights into dissociation in particular Dissociative Identity Disorder DID and offers a variety of responses to the questions of self identity and dissociation With contributions from a range of clinicians from both America and Europe areas of discussion include the concept of dissociation and the current lack of understanding on this topic the verbal language of trauma and dissociation the meaning of children's art the dissociative defence from the average to the extreme pioneering new theoretical concepts on multiple bodies This book brings together

latest findings from research and neuroscience as well as examples from clinical practice and includes work from survivor writers As such this book will be of interest to specialists in the field of dissociation as well as psychoanalysts both experienced and in training This book follows on from Valerie Sinason e tm s Attachment Trauma and Multiplicity Second Edition and represents a confident theoretical step forward

The Diagnosis and Treatment of Dissociative Identity Disorder Ronald A. Moline,2012-10-04 The diagnosis of dissociative identity disorder formerly known as multiple personality disorder remains controversial despite its inclusion as an established diagnosis in psychiatry s Diagnostic and Statistical Manual DSM IV This book consists first of the detailed description of the treatment of a patient whose syndrome of DID emerged in the course of therapy by a psychoanalyst who entered into the therapy as a complete skeptic The therapist s willingness to explore the meaning and reality of the dramatic and at times bizarre presentation of this disorder in a prolonged and difficult treatment was accompanied by an eventual successful outcome Using this case as a reference point the author then provides a contemporary exploration of the literature about the authenticity of this diagnosis and approaches to its treatment

Time to (Re-)integrate Dissociation into Psychoanalytic Psychotherapy? Paul Cundy,Golan Shahar,2025-03-28 This book brings together contributions from leading authors in the field of dissociation to facilitate the pursuit of integrative clinical scholarship connecting psychoanalytic thinking and practice with dissociation research and treatment Dissociation is not merely altered consciousness it is an attack on consciousness on memory identity and goal directed action The attempts by early psychoanalytic theorists to grapple with this clinical entity were marred by the very same frustration evinced by contemporary descriptive psychopathologists who were faced with understanding the similarities and differences between dissociative symptoms and disorders and other types of psychopathologies The DSM V and ICD 11 categorize at least six dissociative disorders Some of these diagnoses have provoked controversy and skepticism Whilst many if not most clinicians will have encountered various forms of dissociative psychopathology Dissociative Identity Disorder remains an elusive and contested presentation Perhaps in parallel to the disorder itself it continues to be challenging for theorists and clinicians to view the field as a whole and contain the disagreements contradictions and paradoxes This book will be of use to researchers and students of clinical psychology psychiatry and psychotherapy The chapters in this book were originally published as a special issue of Psychoanalytic Psychotherapy

Holistic Therapy for People with Dissociative Identity Disorder Patricia Frankish,Valerie Sinason,2018-03-26 This book puts forward a model of therapy and support for people with DID that provides individual therapy staff support and a safe place to live It relies upon the ideas of Bowlby by providing a secure base and this recognises the attachment needs It also includes staff who are trained to provide a therapeutic environment and also receive support to do their work The fourth element after the base the staff and the training is the individual therapy Together it has been possible to adopt a holistic approach which leads to a significant improvement in quality of life for individuals with DID and confidence for commissioners and teams in the approach By

including the perspective of all the players and presenting a practical model for successful working the book will be invaluable to anyone looking to commission or provide services for this client group **Treating Trauma-Related**

Dissociation Kathy Steele, Suzette Boon, Onno van der Hart, 2016-11-29 Winner of the 2017 International Society for the Study of Trauma and Dissociation ISSTD Pierre Janet Writing Award Establishing safety and working with dissociative parts in complex trauma therapy Therapists around the world ask similar questions and struggle with similar challenges treating highly dissociative patients This book arose not only out of countless hours of treating patients with dissociative disorders but also out of the crucible of supervision and consultation where therapists bring their most urgent questions needs and vulnerabilities The book offers an overview of the neuropsychology of dissociation as a disorder of non realization as well as chapters on assessment prognosis case formulation treatment planning and treatment phases and goals based on best practices The authors describe what to focus on first in a complex therapy and how to do it how to help patients establish both internal and external safety without rescuing how to work systematically with dissociative parts of a patient in ways that facilitate integration rather than further dissociation how to set and maintain helpful boundaries specific ways to stay focused on process instead of content how to deal compassionately and effectively with disorganized attachment and dependency on the therapist how to help patients integrate traumatic memories what to do when the patient is enraged chronically ashamed avoidant or unable to trust the therapist and how to compassionately understand and work with resistances as a co creation of both patient and therapist Relational ways of being with the patient are the backbone of treatment and are themselves essential therapeutic interventions As such the book also focused not only on highly practical and theoretically sound interventions not only on what to do and say but places strong emphasis on how to be with patients describing innovative compassionately collaborative approaches based on the latest research on attachment and evolutionary psychology Throughout the book core concepts fundamental ideas that are highlighted in the text in bold so they can be seen at a glance are emphasized These serve as guiding principles in treatment as well as a summing up of many of the most important notions in each chapter Each chapter concludes with a section for further examination These sections include additional ideas and questions exercises for practicing skills and suggestions for peer discussions based on topics in a particular chapter meant to inspire further curiosity discovery and growth **Handbook of Dissociation** Larry K.

Michelson, William J. Ray, 1996-03-31 This timely handbook provides state of the art coverage of both current and emerging theories research and treatment of dissociative phenomena The book opens with a discussion of the historic epidemiologic phenomenologic etiologic normative and cross cultural dimensions of dissociation providing an empirical foundation for the remaining chapters Subsequent chapters examine the developmental aspects of dissociative disorders in addition to psychological and psychophysiological assessments Eight case studies apply dissociation theory and research to specific treatment modalities **Attachment, Trauma and Multiplicity, Second Edition** Valerie Sinason, 2010-12-09 This Revised

Edition of Attachment Trauma and Multiplicity investigates the subject of Dissociative Identity Disorder With brand new chapters on police work and attachment theory it has been fully updated to include new research and the latest understanding of patterns of attachment theory that lead to dissociation With contributions from psychotherapists psychiatrists psychoanalysts and service users this book covers the background history and a description of the condition along with the issues of diagnoses and treatment It also looks at the phenomenon of DID the conflicting models of the human mind that have been found to try and understand DID the political conflict over the subject including problems for the police clinical accounts and personal writing of people with DID Attachment Trauma and Multiplicity Second Edition will prove essential reading for therapists and mental health workers as well as being a valuable resource for graduates and researchers

Treating Complex Trauma and Dissociation Lynette S. Danylchuk, Kevin J. Connors, 2023-08-29 Treating Complex Trauma and Dissociation is the ideal guide for the front line clinician whose clients come in with histories of trauma abuse self injury flashbacks suicidal behavior and more The second edition includes the latest research and developments in treatment for trauma and dissociative disorders The book is written with the knowledge that survivors may read it and the authors have consciously maintained the dignity of the survivors throughout Clinicians will find that the chapters help them develop their own responses and practical solutions to common questions including How do I handle this What do I say and What can I do Treating Complex Trauma and Dissociation is the book clinicians will want to pick up when they re stuck and is a handy reference that provides the tools needed to deal with difficult issues in therapy It is supportive and respectful of both therapist and client and most of all useful in the office

Trauma and Dissociation Informed Psychotherapy Elizabeth Howell, 2020-04-28 A fresh look at the importance of dissociation in understanding trauma A new model of therapeutic action one that heals trauma and dissociation is overtaking the mental health field It is not just trauma but the dissociation of the self that causes emotional pain and difficulties in functioning This book discusses how people are universally subject to trauma what trauma is and how to understand and work with normative as well as extreme dissociation In this new model the client and the practitioner are both traumatized and flawed human beings who affect each other in the mutual process that promotes the healing of the client psychotherapy Elizabeth Howell explains the dissociative relational and attachment reasons that people blame and punish themselves She covers the difference between repression and dissociation and how Freud s exclusive focus on repression and the one person fantasy Oedipal model impeded recognition of the serious consequences of external trauma including child abuse The book synthesizes trauma dissociation perspectives and addresses new structural models
