The Oxford Handbook of International Business Alan M. Rugman, 2003 This handbook synthesises some literature of the last 40 years in 28 chapters The coverage is split into the following areas the history and theory of the multinational enterprise the political and policy environment of international business *Location of International Business Activities* Academy of International Business ., 2014-12-02 In recent years an extensive range of new research has been revisiting the topic of the location of international business activities from a variety of different perspectives and background

interests This work has been inspired in part by two apparently quite different but actually related contemporary trends on the one hand an emergence or revitalization of clusters of activities co located in or around selected global city regions or fast growing metropolitan areas and on the other hand an increased global dispersion of activities conducted within the value chains managed or coordinated by many large multinational enterprises and their business partners The former trend has given rise to discussions of how the elite of the cultural cognitive economy of the 21st century in Allen Scott's terminology or the creative class Richard Florida's term are now being drawn or brought back to major urban centers while the latter trend is associated with debates over outsourcing and the economic and social consequences of shifts in the ownership and location of distinct nodes of value chains once production systems become more fragmented and the component parts of such systems become more geographically dispersed An increased interest in the subject of international business location has been shown by scholars in Strategic Management in Economic Geography and in Regional Science as well as in our own interdisciplinary field of International Business Studies However as is often the case in academic research communities these bodies of scholarship have tended to develop at something of a distance from one another each conversing internally more than they have with one another Location of International Business Activities aims to promote a greater conversation between those interested in the topic of Location from various different backgrounds or starting points The articles are taken from a special issue on the theme of the Multinational in Geographic Space which was published by The Journal of International Business Studies in 2013

The Routledge Companion to the Geography of International Business Gary Cook, Jennifer Johns, Frank McDonald, Jonathan Beaverstock, Naresh Pandit, 2018-05-08 The fields of Economic Geography and International Business share an interest in the same phenomena whilst each provides both a differing perspective and different research methods in attempting to understand those phenomena The Routledge Companion to the Geography of International Business explores the nature and scope of inter disciplinary work between Economic Geography and International Business in explaining the central issues in the international economy Contributions written by leading specialists in each field including some chapters written by inter disciplinary teams focus on the nature of multinational firms and their strategies where they choose to locate their activities how they create and manage international networks and the key relationships between multinationals and the places where they place their operations Topics covered include the internationalisation of service industries the influence of location on the competitiveness of firms and the economic dynamism of regions and where economic activity takes place and how knowledge goods and services flow between locations The book examines the areas for fruitful inter disciplinary work
