Monthly Labor Review ,1984 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews **Employee Voice and Participation** Jeff Hyman,2018-06-13 Employee participation and voice EPV concern power and influence Traditionally EPV has encompassed worker attempts to wrest control from employers through radical societal transformation or to share control through collective regulation by trade unions This book offers a controversial alternative arguing that in recent years participation has shifted direction In Employee Voice and Participation the author contends that participation has moved away from employee attempts to secure autonomy and influence over organisational affairs to one in which management ideas and initiatives have taken centre stage This shift has been bolstered in the UK and USA by economic policies that treat regulation as an obstacle to competitive performance Through an examination of the development of ideas and practice surrounding employee voice and participation this volume tracks the story from the earliest attempts at securing worker control through to the rise of trade unions and today s managerial efforts to contain union influence It also explores the negative consequences of these changes and though the outlook is pessimistic considers possible approaches to address the growing power imbalance between employers and workers Employee Voice and Participation will be an excellent supplementary text for advanced students of employment relations and Human Resource Management HRM It will also be a valuable read for researchers policy makers trade unions and HRM professionals Mechanical Engineering ,1921 *APAIS 1999: Australian public affairs information service* ,

Monthly Summary of the League of Nations League of Nations,1929 **Between Imitation and Innovation** Robert Boyer,Elsie Charron,Ulrich Jurgens,Steven Tolliday,1998-11-19 Recent years have seen intense debates among management and academics on the rise of lean production and Japanization Some authors have stressed the universal impact of new forms of work organization and best practice while others have questioned the limits of convergence stressed the weight of national contexts or societal effects or highlighted the evolutionary effects of unpredictability in the external environment The international automobile industry has been a focus for much of this debate and this book written by a team of leading international researchers in the field uses this industry to examine in detail the actual practice of the transfer and adaptation of productive models and the trajectories of innovation compromise and failure that can result Case studies cover in detail the Japanese transplant experience in North America and the global experience of hybrid production systems in Europe Latin America and Asia The book contributes to theoretical discussions about the transfer adaptation or convergence of productive models In particular the authors argue that direct transplantation or imitation of these models is rarely feasible or even desirable Systems cannot be transferred without being significantly reshaped Instead the book focuses on the process of hybridization the complex interaction of productive models with national and societal effects Hybridization it is argued is

inevitable But this should be seen not simply as a process of compromise and retreat but also as an important dynamic of innovation and learning This book is from the French based international research network GERPISA Groupe d tude de rcherche permanent sur l industrie et les salaires de l automobile See related titles below
