Multinationals and Global Capitalism Geoffrey Jones, 2005 This

book provides a unique contribution to contemporary globalization debates by providing an accessible survey of the growth and role of multinational enterprises in the world economy over the last two hundred years. The author shows how entrepreneurs built a global economy in the nineteenth century by creating firms that pursued resources and markets across borders. It demonstrates how multinationals shifted strategies as the first global economy disintegrated in the political and economic chaos between the two world wars and how they have driven the creation of the contemporary global economy. Many of the issues of the global economy have been encountered in the past. This book shows how entrepreneurs and managers met the political, ethical, cultural, and organizational challenges of operating across national borders at different times and in different environments. The role of multinationals is placed within their wider political and economic context. There are chapters on the impact of multinationals and on relations with governments. The focus on the shifting roles of firms and industries over time rather than abstract trade and capital flows provides compelling evidence on the diversity and discontinuities of the globalization process. The book explains the history of multinationals across a wide spectrum of manufacturing, service, and natural resource industries from an international perspective which ranges widely across different countries. It provides an essential historical framework for understanding global business. An accessible survey of the history of international business worldwide; this book will be key reading for students taking courses in International Business, Business History, Multinationals, and Entrepreneurship and of interest to academics and researchers working in these areas.

Indian Multinationals in the World Economy Jaya Prakash Pradhan, 2008. Indian multinationals have been active in the world economy since early 1960s. However, their number and scale of operation have grown significantly in the last fifteen years or so. In the face of increasing global competition unleashed by extensive liberalization measures, Indian firms have adopted the strategy of outward foreign direct investment (OFDI) as an integral part of their business strategies. By undertaking greenfield OFDI and brownfield OFDI for acquiring foreign companies, Indian firms are enhancing their potential for growth and global competitiveness. Consequently, India has emerged as a major developing source country of FDI, and Indian multinationals are likely to affect world development in several ways. The book analyses the phenomenon of Indian multinationals from both macro-level factors and firm-level corporate strategies and examines its implications for India and host countries. A detailed investigation of Indian overseas investment flows and stocks from sectoral, regional, ownership, and motivational perspectives provides a rigorous long-run coverage of Indian multinational firms from 1970s onwards. The role of innovation, entrepreneurial skills, scale of business, productivity, and the role of government policies received critical attention in explaining the emergence of Indian multinationals. The comprehensive quantitative and case studies approach offers valuable insights into the behaviour and impacts of these new global actors on home and host countries. This book offers a number of lessons to home country, host countries, and Indian enterprises becoming multinationals. With the growing global interest from policy makers, business practitioners, researchers, and students in Indian multinationals, this book would

serve as an important and timely reading for all of them
