

The background of the cover is an abstract composition. It features a faint, stylized profile of a human face, possibly a classical statue, rendered in a light blue and white tone. Overlaid on this are vibrant, multi-colored lines in shades of blue, green, yellow, and magenta. These lines form a complex, web-like pattern that resembles a network or a series of intersecting paths, creating a sense of depth and movement. The overall effect is a blend of classical art and modern, scientific or mathematical aesthetics.

Multiple Facets of Quantization and Supersymmetry M. A. Olshanetsky, Arkady Vainshtein, 2002 This book is dedicated to the memory of Michael Marinov the theorist who together with Felix Berezin introduced the classical description of spin by anticommuting Grassmann variables The Volume contains original papers and reviews of physicists and mathematicians written specifically for this book These articles reflect the current status and recent developments in the areas of Marinov's research interests quantum tunneling quantization of constrained systems supersymmetry and others Included personal recollections portray a human face of Michael Marinov a person of great knowledge and integrity
