Pistorius, 2012-10-03 The first comprehensive study of serial homicide in South Africa is intended primarily for psychologists students educators and police officers who require background on the behavioural patterns motives and other details about serial killers It is a serious attempt to understand the mind of the serial killer so that he may be identified and apprehended as soon as possible For as the author points out serial killers prospects of rehabilitation are negative and they need to be removed from society for the remainder of their lives Detectives need specific training to investigate serial homicide and Pistorius believes that an understanding of the psychodynamics of serial killers should be extended to state prosecutors judges parole officers and pathologists She also believes that those who work with children need to be aware that all documented cases of serial killers reveal either childhood abuse or neglect and that children displaying antisocial behaviour should be identified and receive counselling Only in being proactive in preserving the mental health and well being of children can the double tragedy of serial homicide ultimately be prevented **Champions of the Cherokees** William G.

Cabana,1998-05-07 A Season of Change Racial Violence In Kentucky George C. Theorizes race and nation in the cultural aftermath of the LA riots **The Image of the Non-Jew in Judaism** David Novak,2011-08-25 This classic study of the idea of Noahide law traces the concept s historical development and shows how it is relevant to practical discussions of the halakhah pertaining to non Jews and to relations between Jews and non Jews Individual analyses of each of the seven Noahide laws drawing primarily on classical rabbinic texts by traditional commentators are followed by a discussion of the underlying theory **Ten Medieval Studies** George Gordon Coulton,1959 First ed published in London in 1906 under title *Mediaeval studies* **The Official History of Criminal Justice in England and Wales** Paul Rock,2019-04-23 Volume I of *The Official History of Criminal Justice in England and Wales* frames what was known about crime and criminal justice in the 1960s before describing the liberalising legislation of the decade Commissioned by the Cabinet Office and using interviews British Government records and papers housed in private and institutional collections this is the first of a collaboratively written series of official histories that analyse the evolution of criminal justice between 1959 and 1997 It opens with an account of the inception of the series before describing what was known about crime and criminal justice at the time It then outlines the genesis of three key criminal justice Acts that not only redefined the relations between the State and citizen but also shaped what some believed to be the spirit of the age the abolition of capital punishment and the reform of the laws on abortion and homosexuality The Acts were taken to be

so contentious morally and politically that Governments of different stripes were hesitant about promoting them formally The onus was instead passed to backbenchers who were supported by interlocking groups of reformers with a pooled knowledge about how to effectively organise a rhetoric that drew on the language of utilitarianism and the clarity and authority of a Church of England This came to play an increasingly consequential and largely unacknowledged part in resolving what were often confusing moral questions This book will be of much interest to students of criminology and British history politics and law
