## **Murder In North America:**

*Murder in America* Ronald M. Holmes, Stephen T. Holmes, 2001 This second edition of the best selling *Murder in America* examines both the common and unusual acts of homicide in light of society's changing norms, values, attitudes, and customs. The authors, Ronald and Stephen Holmes, have worked with numerous police departments on more than 300 murder and rape cases. The types of murders discussed in this text are ones not usually discussed in great lengths in other textbooks. Chapters deal with atypical and relatively bizarre homicide such as serial murder, mass murder, terrorism, and assassination. Also discussed are more common types of murder such as murder committed by children, murder of children, partner homicide, and workplace homicide. Each chapter explores a specific type of homicide by examining trends, methods, motives, statistics, and other descriptive information. New to this edition: Student Assignments at the end of each chapter; Discussion Questions at the end of each chapter. New chapters in this edition: Female Serial Killers; Intimates Who Kill; Parents Who Kill; Murder in the Workplace.

*Introduction to Deaths in 2023* Gilad James, PhD, The article *Introduction to Deaths in 2023* is a commissioned report that investigates the various causes of death that are predicted to occur in the year 2023. The report analyses data from past years to make projections on future trends. The main causes of death identified in 2023 are cancer, heart disease, respiratory illness, diabetes, and accidents. The report attributes the high mortality rate from cancer and heart disease to an aging global population coupled with an increase in smoking and a sedentary lifestyle. The rise in respiratory illness is attributed to pollution and poor air quality. The report emphasizes the need for lifestyle changes, clean energy sources, and policies that promote a healthy lifestyle to reduce the incidence of disease. The article raises significant challenges that health practitioners, policymakers, and individuals face in tackling the problem of mortality. The report underscores the need for proactive measures to combat smoking, pollution, and unhealthy lifestyles. It also highlights the importance of early detection and treatment of chronic diseases such as cancer and heart disease to improve health outcomes. The report concludes by urging governments and individuals to work together to bring about social change in

areas such as diet exercise and smoking It highlights the importance of sustained efforts to ensure that people can lead healthy lives and avoid unnecessary deaths
