North By South:

A History of Contemporary Korea Man-gil Kang, 2019-11-26 Now available in English this important new contribution from a distinguished Korean historian on the history of twentieth century Korea is divided into two parts first the Japanese colonial period including detailed accounts of the anti Japanese independence movements followed by the liberation of Korea the Korean War and political developments up to the late 1980s Acknowledgement is also made of the work of North Korean scholars Bulletin, 1910 **The Emergence Of The Nio Ideology** Craig Murphy, 2019-07-11 This study traces the political history of the ideas underlying Third World calls for a New International Economic Order Filling a significant gap in the literature the book shows that NIEO ideology has a direct unbroken line of development extending back to World War II when a new international economic order the Bretton Woods system was created Dr Murphy maintains that NIEO ideology is not rooted only in Third World acceptance of Prebisch's views on trade rather it evolved from Third World attempts to cope with problems and opportunities that emerged as the Bretton Woods system was created operated and began to break down By the 1970s the ideology had become a complex and coherent analysis of the economic position of Third World states including a political analysis of how Third World views could be made dominant Many of Dr Murphy's conclusions challenge the conventional wisdom about the Third World position of the NIEO In addition his study offers insight into the relatively unexplored area of how changes in political and social consciousness affect international systems and provides grounds on which officials from both the South and the North can see the others views as less alien *Chinese Lexical Semantics* Pengyuan Liu, Qi Su, 2013-12-12 This book constitutes the refereed selected papers from the 14th Chinese Lexical Semantics Workshop CLSW 2013 held in Zhengzhou China in May 2013 The 68 full papers and 4 short papers presented in this volume were carefully reviewed and selected from 153 submissions They are organized in topical sections covering all major topics of lexical semantics lexical resources corpus linguistics and applications on natural language processing First and Second Order Triangulation and Traverse in Minnesota (1927 Datum) U.S. Coast and Geodetic Survey, Walter Ford Reynolds, 1936

The Mills-Bakeries of Ostia Jan Theo Bakker, 2023-01-16 The ruins of Ostia main harbour of Imperial Rome were uncovered in the late nineteenth and first half of the twentieth century In the present volume the remains of three buildings used for the milling of grain and baking of bread pistrina are studied according to modern archaeological standards A detailed analysis of the architecture and masonry allows a description of the installation and vicissitudes of the pistrina Subsequently the distribution of these buildings in the city and their place in the neighbourhood is studied The technical achievement of the Ostian bakers is assessed Although water power was sometimes used in Roman grain mills this was not the case in Ostia This in turn affects estimates of the output of the pistrina Nevertheless the amount of bread that was produced must have been considerably higher than that in Pompeii where many small bakeries have been preserved No remains of bakeries have ever been found in Rome or Constantinople but it may be assumed that the average bakery in these

cities did not differ much from the Ostian workshops Involvement of the fisc with the Ostian bakers has already been suggested by Bakker in *Living and Working with the Gods* The role of the Emperor is dealt with in this volume once more The Ostian corpus pistorum presumably fed Imperial slaves and the local fire brigade There are good reasons to assume that Ostia like Rome knew distributions of free grain

The Political Economy of Globalization Satya Dev Gupta,2012-12-06 Globalization is transforming the world at an accelerated pace Integration of the world continues widening and intensifying international linkages in economic political and social relations Liberalization of trade and fmance lubricated by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development Horos Dios Gerald Lalonde,2021-11-29 Horos Dios draws on a wide variety of literary and archaeological evidence to argue that an Archaic horos inscription and other rock cuttings on the northeast slope of the Hill of the Nymphs in Athens are remnants of a shrine of Zeus Meilichios a popular god of purification worshipped widely in Athens Attica and the greater Greek world
