Participatory Video in Adult Education Kyung-Hwa Yang, 2016-06-07 This book highlights participatory video as an instrument for community based adult education and focuses in particular on the role that it can play in promoting participatory culture among adult learners In brief participatory video refers to participant centered video making Today participant generated videos can travel farther and faster than ever before and thus the perspectives represented can be

effectively shared by a large number of people Participatory video can also offer those involved an opportunity to address issues that matter to them and give voice to their experiences The author explores this potential based on her experience working with adult learners in a metropolitan community and addresses participatory video in both theory and practice The target readership is adult educators but it will also be helpful to researchers who have a particular interest in incorporating video into their community based work

Conflicting Paradigms in Adult Literacy Education George

Demetrion,2013-06-17 The book provides a historical overview of adult literacy theory policy practice and research from the mid 1980s to the present The main focus is a descriptive analysis of three distinctive schools of literacy the Freirean based participatory literacy movement grounded in oppositional politics and grass roots community activism the British based New Literacy Studies that focuses on the ways in which diverse students utilize various literacy practices in their daily lives and the U S federal government s focus on functional literacy linked to a 45 year policy emphasis on workforce readiness These three schools of thought lead to substantially different implications over such critical areas as curriculum assessment and accountability and the socio cultural role of literacy policy and political culture which are discussed throughout the chapters of the book This discussion includes a chapter on research traditions that closely parallels these perspectives on literacy education Demetrion argues that unless values grounded ultimately in political culture emerge it is exceedingly unlikely that the adult literacy field will be able to move from its current marginalized status toward that of achieving the level of public and policy legitimacy many believe it needs for its long term institutional flourishing It is argued that any settlement of this issue must be accomplished in the field of practice rather than the ground of theory even as theoretical insight can help to frame the issues *Conflicting Paradigms in Adult Literacy Education In Quest of a U S Democratic Politics of Literacy* speaks to a wide audience including not only the adult literacy community but anyone interested in educational theory practice policy research traditions or political culture and more fundamentally in their intersection Given the breadth of the topics covered as well as the broad scope of the argument the book is also meant for those who would like to gain a useful perspective on contemporary U S culture through the window of these conflicting tensions within the field of adult literacy education
