The scope of this handbook's coverage and contributions engages with and reflects upon the most important innovative and recent critical developments to the interdisciplinary field of urban politics drawing upon a range of examples from within and across the Global North and Global South. This handbook is organized into nine interrelated sections with an introductory chapter setting out the rationale, aims and structure of the Handbook and short introductory commentaries at the beginning of each part. It questions the eliding of urban politics into the politics of the city, reconsidering the usefulness of the distinction between old and new urban politics, considering issues of class, gender, race and the ways in which they intersect, appear and reappear in matters of urban politics, how best to theorize the roles of capital, the state and other actors such as social movements in the production of the city and finally issues of doing urban political research. The various chapters explore the issues of urban politics of economic development, environment and nature in the city, governance and planning, the politics of labour as well as living spaces. The concluding sections of the Handbook examine the politics over alternative visions of cities of the future and provide concluding discussions and reflections, particularly on the futures for urban politics in an increasingly global and multidisciplinary context. With over forty-five contributions from leading international scholars in the field, this handbook provides critical reviews and appraisals of current conceptual and theoretical approaches and future developments in urban politics. Globalization and Labour in the Twenty-First Century Verity Burgmann, 2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 3.0 license. Globalization has adversely affected working class organization and mobilization, increasing inequality by redistribution upwards from labour to capital. However, workers around the world are challenging their increased exploitation by globalizing corporations. In developed countries, many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances; in developing countries, militant new labour movements are emerging. Drawing upon insights in anti-determinist Marxist perspectives, Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim. She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century. With case studies from around the world, including Greece since 2008, she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change. Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization. This book will be of interest to students and scholars of labour studies, globalization.
