Reshaping the Chinese Military Richard A. Bitzinger, James Char, 2018-11-09 This edited volume examines the recalibration of the People's Liberation Army's PLA roles and missions in China's domestic and foreign policymaking since Xi Jinping's ascension to power in late 2012 This book explores how China's growing military prowess along with Beijing's

ongoing shift away from keeping a low profile owes much to the policies of the China's Communist Party under Xi Jinping's leadership. The chapters in the book share a central theme: the recalibration of the PLA's roles and missions since Xi Jinping assumed the trifecta of party-state military power. These contributions seek to explore in depth some of the key issues and scrutinize the enhancements in the PLA's operational capabilities both in terms of its hardware as well as its heartware: the human elements of its development such as operational culture and doctrine. In all the chapters document the transformative change the PLA has undergone since the profound realization of its previous limitations vis-à-vis the United States' advanced military operations of the previous century as well as pointing to continuity amid change. This book will be of much interest to students of strategic studies, Chinese politics, Asian security, defense studies, and international relations in general. Mao's Way Edward E. Rice, 2023-11-10 This major biography of Mao draws on never before seen documents to reveal surprising details about Mao's rise to power and leadership in China. This title was originally published in 1972. *The A to Z of the Chinese Cultural Revolution* Jian Guo, Yongyi Song, Yuan Zhou, 2009 There has never been anything quite like the Cultural Revolution which disrupted life in the People's Republic of China from 1966 to 1976. It wreaked havoc in the world's most populous country, often turning life upside down and undermining the party government and army, weakening the economy, society, and culture. Tens of millions were hurt or killed during this period, and relatively few benefited, aside from Mao Zedong and temporarily the Gang of Four. *The A to Z of the Chinese Cultural Revolution* provides an extensive chronology that traces the events of the revolution, and the introduction puts those events in context and explains them. The bulk of the information is provided in numerous dictionary entries on important persons, places, institutions, and movements. The bibliography points to further resources, and the glossary helps those researching in Chinese. Book Jacket **The Chinese State in the Era of Economic Reform : the Road to Crisis** Jay D White, 2016-09-16 Presents ten tales featuring Lord Bao, a wise judge who was a champion of righteousness and protector of the weak against the powerful. Reader's Guide to Military History Charles Messenger, 2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th-century intervention operations. Designed for a wide variety of users, it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts. The book examines naval and air warfare as well as significant individuals including commanders, theorists, and war leaders. Each entry includes a listing of additional publications on the topic, accompanied by an article discussing these publications with reference to their particular emphases, strengths, and limitations. *The Chinese People's Liberation Army in 2025* Roy Kamphausen, David Lai, Army War College (U.S.). Strategic Studies Institute, 2015 This updated volume is of special relevance in light of the profound changes

occurring within the Chinese People's Liberation Army (PLA). China's desire to develop a military commensurate with its diverse interests is both legitimate and understandable. The challenge for U.S. Pacific Command (USPACOM) is to understand how China will employ this growing military capability in support of its interests. The book addresses the uncertainty surrounding the potential direction of the PLA by examining three distinct focus areas: domestic, external, and technological drivers of PLA modernization; alternative futures for the PLA; and implications for the region, world, and U.S.-China relations. The analysis provides an insightful perspective into the factors shaping and propelling the PLA's modernization, its potential future orientation ranging from internally focused to globally focused, and how the PLA's choices may impact China's relations with its neighbors and the world. Audience: Military personnel, policy analysts, lawmakers, and foreign officers in the Asia-Pacific region may find many insights in this book pertaining to the development of the Chinese People's Liberation Army under the leadership of Chinese President Xi Jinping. High school, community college, and undergraduate university students pursuing coursework and research for United States 1945-Present global studies and world history classes may find this text helpful for classroom debates about the expansion of the Chinese military role. Graduate students may find this work helpful for International Relations, Chinese Studies, and Global Affairs coursework in the pursuit of a Master's Degree program in these areas. The Chinese Communist Armed Forces Kenneth R. Whiting, 1974. Although the history and present state of the Chinese Communist military forces are not as well covered as those of the Soviet Union, nevertheless there is a relatively large number of books, articles, and source collections available in English. Then why this study? The answer is simply that this is an attempt to tell the story of the Chinese Red Army in as concise a form as possible without compressing the narrative to the point of distortion. The study may seem overstuffed with facts or what pass for facts, but the author can assure the reader that he did his best to eliminate all but those he considered essential. The historical approach has been used for the simple reason that like any other organism, the Chinese Red Army is a melange of strengths and weaknesses rooted in its evolution.

China's Strategic View June Teufel Dreyer, 1996. Although the militant rhetoric of past decades has abated, the leadership of the People's Republic of China (PRC) is profoundly dissatisfied with the international status quo. The dissolution of the Soviet Union weakened China's ability to wrest concessions from the United States by threatening to move closer to the USSR, and from the USSR by threatening to support the United States. While some leverage can and is gained by negotiating with the major successor state to the Soviet Union, this leverage is more limited than in the past. The Russian Republic is significantly weaker than the USSR and finds aid and investment from capitalist states such as the United States useful to its rebuilding efforts. It is unlikely to jeopardize this aid by becoming too closely associated with Chinese positions that these countries oppose. Other indications are that the Chinese leadership's goal is to replace the United States as the hegemonic power in the Asian region. It sees the PRC as an ascendant power while America, which has

withdrawn from bases in the Philippines downsized its military personnel slashed its defense procurement programs and consigned its navy to a littoral role is seen as declining Should China assume the role of hegemon there are likely to be territorial readjustments in the region The PRC contests ownership of several different islands and island chains with no less than six other countries and there are concerns within India that the close relationship that has developed between China and the State Law and Order Restoration Council SLORC in Burma may have a Chinese presence in the Indian Ocean as one of its goals Though Sino Indian relations have been quite good in recent years there are unresolved issues between the two countries and China's victory over India in a 1962 border war is a painful memory for many Indians The Chinese People's Liberation Army PLA plays a dual role in the country's strategic view it participates in the formulation of strategy at the same time as it is charged with implementing that strategy The apparent active involvement of higher echelons of the PLA in formulating national policy sets the Chinese military apart from the Western ideal in which politicians decide upon policy and the military implements it Several caveats are in order here Mao Zedong formulated a principle that is not very different from the Western ideal of the separation of army and politics the party must always control the gun the gun must never control the party And Clausewitz though saying that there can be no question of a purely military evaluation of a great strategic issue nor of a purely military scheme to solve it also cautioned that political leaders should be careful not to ask the impossible of the military and advised them to consult with senior commanders in planning and conducting military operations¹ Finally virtually all the recent information indicating that the PLA is exerting pressure for a harder line internationally comes from the Hong Kong press and cannot be confirmed through mainland sources Hence the dichotomy between the role of the military in the PRC and that in the West may be overdrawn Analysts of recent Chinese foreign policy portray it as a struggle between soft liners and hard liners Those who espouse a soft line believe that the PRC's best interests are served by negotiating settlements to China's territorial disputes with other nations and engaging foreign powers in dialogue on contentious issues such as trade disputes and intellectual property rights Hard liners assume a more defiant posture The doctrine of absolute sovereignty the unilateral right of the PRC to annex territory it considers part of the sacred territory of China and a skeptical attitude toward the claims of other countries characterize their stance
