House. Foreign Affairs Committee,1974 Labor and Economic Reforms in Latin America and the Caribbean ,1995-01-01 Over the past decade most countries in the Latin America and Caribbean Region have stabilized their economies and lowered barriers to international trade Many of the policies aimed at reducing poverty and tackling inequality in the 1960 1980 period were well intentioned but the region made little or no progress in improving income distribution With the recent shift toward market orientation and openness to international trade these countries will need a new approach to labor policy as well as different instruments for addressing income distribution goals This report gives special attention to four areas of labor policy 1 change from direct government intervention in wage determination and strict seniority rules to a system that rewards effort high productivity and good management within a framework that relies on voluntary negotiation of working conditions between workers and firms 2 replacement of job security legislation by a more effective mechanism that protects workers when they change jobs 3 careful design of mandatory contributions to social security and other programs in order to minimize the distortionary effect of labor taxes and 4 redirecting of government subsidies for training and education to the demand side and targeting to those who cannot afford to pay *Global Economic Prospects, Volume 6, January 2013* World Bank,2013 _x000D_ Fragile rebound after mid year turmoil _x000D_ Financial markets conditions have improved markedly since mid 2012 due to national and EU wide measures to improve fiscal sustainability and the augmentation of measures that the European Central Bank ECB would take in defense of the euro but so far the so far economic growth has not rebounded as sharply partly because of policy induced uncertainty which has contributed to keep business sector confidence low _x000D_ While growth showed signs of accelerating in Q3 of 2012 including in major middle income countries such as Brazil and China uncertainties being generated by the US election and fiscal cliff concerns coupled with tensions between China and Japan over competing land claims cut into Q4 growth in high income and developing countries **Foreign Debt and Latin American Economic Development** Antonio Jorge,Jorge Salazar-Carillo,Rene P. Re-Envisioning Global Development Sandra Halperin, 2013-04-17 Re Envisioning Global Development offers an original conceptualisation of capitalist development from its origins to the present day Most approaches to understanding contemporary development assume that industrial capitalism was achieved through a process of nationally organised economic growth and that in recent years its organisation has become increasingly trans local or global However Halperin shows that nationally organised economic growth has rarely been the case it has only recently come to characterise a few countries and for only a few decades This innovative text elaborates an alternative ontology and way of thinking about global development during the last two centuries one linked not to nations and regions but to a set of essentially trans national relations and connections It argues that capitalist development has everywhere and from the start involved not whole nations or societies but only sectors or geographical areas within states By bringing this aspect of historically normal capitalist development into clearer focus the book clarifies the specific conditions and circumstances that enabled European economies to pursue a more broad based development following World War II and what prevented a similar outcome in the contemporary third world It also clarifies the nature spatial extent and circumstances of current globalising trends Wide ranging and provocative this book is required reading for advanced level students and scholars in development studies development economics and political science
