Loo Keng Hua Selected Papers:

Selected Papers Luogeng Hua, 1983 From the Preface by H Halberstam The unexpected arrival of Loo Keng Hua in Europe in the fall of 1978 was for many of us a romantic event a legend come to life What had long been and had seemed destined to remain merely a revered name in the mathematical annals of our times assumed suddenly the handsome presence of the man himself dignified yet jovial youthful yet wise serene yet ever questing for new achievements and we realized how very much we had missed by his thirty years absence from the international scene While the publication of theses Selecta from his writings needs no justification beyond what is in them it will I hope serve also as a way of saying a most cordial welcome back It has been an honor for me to play a small role in producing the Selecta To select only parts from the imposing whole is automatically to be wrong and it may well seem in the long run to quote loosely from a poem of Hua himself that I have repaid gifts in jade with artifacts of wood

Hua Loo-Keng Yuan Wang,1999 The distinguished mathematician Hua Loo Keng led an eventful and interesting life through a particularly difficult period in China This biography originally published in Chinese in 1995 looks in detail at the transformation of Hua from a self taught individual into a world renown mathematician Hua held a prominent position in the contemporary mathematics circle in China and thus this account of his life can be read as in invaluable historical evaluation of the development of mathematics in China especially during tumultuous events such as the Cultural Revolution and the Great Leap Forward Besides giving a vivid illustration of Hua s research work in number theory and of his attitude towards and philosophy behind the learning and teaching of mathematics the author a student and close friend of Hua s delves into the latter s tireless efforts in popularizing mathematics in China until his death in 1985 Selected Papers Of Wang Yuan Yuan Wang,2005-06-07 This volume presents a comprehensive collection of Wang Yuan s original important papers which are not available elsewhere since the majority of the papers were published in China Covering both pure number theory and applied mathematics this book is important for understanding Wang Yuan s academic career and also the development of Chinese mathematics in recent years since Wang Yuan s work has a wide ranging influence in China Wang Yuan is a professor and academician of the Chinese Academy of Sciences He received his honorable Doctorship from Hong Kong Baptist University He has published 70 papers and ten books Popularizing Mathematical Methods in the People's Republic of China L.K. Hua,Wang,2012-12-06 Professor Hua Loo Keng is the first person to have undertaken the task of popularizing mathematical methods in China As early as 1958 he proposed that the application of operations research methods be initiated in industrial production With his students Yu Ming I Wan Zhe Xian and Wang Yuan Professor Hua visited various transportation departments to promote mathematical methods for dealing with transportation problems and a mass campaign was organized by them and other mathematicians to advance and apply linear programming methods to industrial production in Beijing and in Shandong province However due to the fact that these methods have limited applications and their computation is rather complex their popularization and utilization in China have so far been restricted to a small number of sectors such as the above mentioned transportation departments In 1958 Hua Loo Keng proposed the use of Input Output methods in the formulation of national economic plans Apart from publicizing this method he carried out in depth research on the subject He also gave lectures on related non negative matrix theory pointing out the economic

significance of various theoretical results My Mathematical Life Yuan Wang, 2024-03-21 This book is an autobiographical interview with Chinese Academician Yuan Wang on his experience in mathematical research The book looks back on Wang's collaboration with his teacher Hua Loo Keng and younger scholars offering insights into fruitful cooperation in mathematical research In this book Yuan Wang's path of studying Goldbach conjecture is revealed in detail from motivation to method Then his work on algebraic number theory is traced back in a separate chapter The book ends with two chapters which introduce Wang's interest in history of mathematics and his hobbies outside of mathematical research Wang shows how a mathematician can in the same time be a historical and popular science writer and in particular a well received calligrapher The book is intended for undergraduate and graduate students studying number theory Researchers who are willing to learn from the experience of an established mathematician as well as math amateurs and general audience who are interested in Yuan Wang's life story might also find this book appealing
