Supramolecular Chemistry Vincenzo Balzani, L. de Cola, 2012-12-06 The first NATO Science Forum was held in Biarritz in September 1990 This Taormina Conference is the second in a series that we wish to be a long one and I believe that it has equalled the success of its predecessor In setting up these meetings the NATO Science Committee wanted to gather leading experts to review fields of strong present interest It was intended that presentations and discussions should pay special attention to potential developments This forward look is indeed precious to us in mapping out the evolution of our Science Programme but more importantly it is an essential part of the progress of Science I believe that NATO being able to bring together eminent scientists from both sides of the Atlantic is in a privileged position to provide this service to our Scientific Community It was only proper that Chemistry should be one of the first areas to be targeted a central science with many rich

borders touching on other disciplines it deserved the full attention of our Committee In its vast domain among many possible topics the present one was carefully selected and its choice resulted from an extensive consultation of many leading chemists The large fraction of replies which pointed to Supramolecular Chemistry left us with little doubt about the timeliness of a Forum in this area and the strong interest attached to it
