Lunar Bases and Space Activities of the 21st Century Wendell W. Mendell, Lunar and Planetary Institute, United States. National Aeronautics and Space Administration, 1985 **Lunar Bases and Space Activities of the 21st Century** Wendell W. Mendell, 1984 **The Second Conference on Lunar Bases and Space Activities of the 21st Century, Volume 2**, 1992 **The Second Conference on Lunar Bases and Space Activities of the 21st Century, Volume 1**, 1992 **Lunar Bases and Space Activities in the 21st Century** W. Turning Dust to Gold Haym Benaroya, 2016-05-31 The expansion of our civilization to the Moon and beyond is now within our reach technically intellectually and financially Apollo was not our last foray into the Solar System and already science fiction is finding it difficult to keep ahead of science and engineering fact In 1807 few people anticipated the Wright Brothers human flight a hundred years later In 1869 only science fiction writers would have suggested landing people on the Moon in 1969 Similarly other great inventions in mechanics and in electronics were not envisaged and therefore the technologies to which those inventions gave birth were only foreseen by a tiny group of visionaries **The Moon** David Schrunk, Burton Sharpe, Bonnie L. Cooper, Madhu Thangavelu, 2007-11-27 This extraordinary book details how the Moon could be used as a springboard for Solar System exploration It presents a realistic plan for placing and servicing telescopes on the Moon and highlights the use of the Moon as a base for an early warning system from which to combat threats of near Earth objects A realistic vision of human development and settlement of the Moon over the next one hundred years is presented and the author explains how global living standards for the Earth can be enhanced through the use of lunar based generated solar power From that beginning the people of the Earth would evolve into a spacefaring civilisation Future Astronomical Observatories on the Moon Jack O. Burns, Wendell W. Mendell, 1988 **New Views of the Moon** Bradley L. Jolliff, Mark A. Wieczorek, Charles K. Shearer, Clive R. Neal, 2018-12-17 Volume 60 of Reviews in Mineralogy and Geochemistry assesses the current state of knowledge of lunar geoscience given the data sets provided by missions of the 1990 s and lists remaining key questions as well as new ones for future exploration to address It documents how a planet or moon other than the world on which we live can be studied and understood in light of integrated suites of specific kinds of information The Moon is the only body other than Earth for which we have material samples of known geologic context for study This volume seeks to show how the different kinds of information gained about the Moon relate to each other and also to learn from this experience thus allowing more efficient planning for the exploration of other worlds Advances In Geosciences (A 6-volume Set) - Volume 19: Planetary Science (Ps) Anil Bhardwaj, 2010-06-17 This invaluable volume set of
