Big Data in Multimodal

Medical Imaging Ayman El-Baz, Jasjit S. Suri, 2019-11-05 There is an urgent need to develop and integrate new statistical mathematical visualization and computational models with the ability to analyze Big Data in order to retrieve useful information to aid clinicians in accurately diagnosing and treating patients The main focus of this book is to review and summarize state of the art big data and deep learning approaches to analyze and integrate multiple data types for the creation of a decision matrix to aid clinicians in the early diagnosis and identification of high risk patients for human diseases and disorders Leading researchers will contribute original research book chapters analyzing efforts to solve these important problems

Level Set Method in Medical Imaging Segmentation Ayman El-Baz, Jasjit S. Suri, 2019-06-26 Level set methods are numerical techniques which offer remarkably powerful tools for understanding analyzing and computing interface motion in a host of settings When used for medical imaging analysis and segmentation the function assigns a label to each pixel or voxel and optimality is defined based on desired imaging properties This often includes a detection step to extract specific objects via segmentation This allows for the segmentation and analysis problem to be formulated and solved in a principled way based on well established mathematical theories Level set method is a great tool for modeling time
