Benn's Media Directory ,1991 *Unesco List of Documents and Publications* Unesco,1994 Nitrogen Cycling in Ecosystems of Latin America and the Caribbean G. Philip Robertson, R. Herrera, T. Rosswall, 2012-12-06 The large and rapidly expanding body of literature related to nitrogen cycling in both managed and native terrestrial ecosystems reflects the importance accorded to the behaviour of this vital and often limiting nutrient Research at the organism ecosystem and landscape levels commonly addresses questions concerning nitrogen acquisition internal cycling and retention Goals for this research include increased agricultural productivity and a better understanding of human impact on local regional and global nitrogen cycles Nitrogen cycle research in tropical regions has a long and distinguished history Research on different aspects of nitrogen cycling in ecosystems of the tropics has been carried out in many regions In relatively few instances has there however been a focus on the biogeochemical cycles at the ecosystem level The meeting resulting in this volume was an attempt to bring together existing information on nitrogen cycling in ecosystems of Latin America and the Caribbean and discuss this in an ecosystem context **75 years of action** UNESCO, 2021-11-09 **Cervical Cancer Control in Latin America and the Caribbean** Angelica Nogueira-Rodrigues, Lucely Cetina-Pérez, Mauricio Maza, 2024-09-27 Worldwide more than half a million women are diagnosed with cervical cancer annually and more than 300 000 die from the disease At least 85% of the deaths occur in low middle income countries LMICs and almost 10% of them in Latin America LATAM and the Caribbean where mortality rates are almost five times higher than in high income areas Infection with high risk subtypes of the Human Papillomavirus HPV is a necessary but not sufficient cause of cervical cancer The natural history of the disease involves persistent high risk HPV infections followed by the development of precancerous cervical lesions and progression to invasive cervical cancer in a process that usually occurs throughout many years The long natural history of the disease provides a window of opportunity for secondary prevention with screening tests which identify women infected with HPV or with cytologic abnormalities indicative of precancerous lesions These lesions can be successfully treated when diagnosed early Besides the existence of a primary infectious etiologic agent allows for primary prevention with prophylactic HPV vaccines capable of reducing the incidence of causative infections Thus cervical cancer is considered a preventable and treatable disease but despite that it continues to be the third cause of cancer in women in the region **Directory of United Nations Information Sources** ,1994 **Directory of United Nations Databases and Information Systems** ,1990 *Benn's Media* ,1995 **Biosphere Reserves** ,2002 *Info MAB* ,1993 **Yearbook of International Organizations 2013-2014 (Volumes 1a-1b)** Union Of International Associations, Union of International

Employing rootedness as a way of understanding identity has increasingly been subjected to acerbic political and theoretical critiques Politically roots narratives have been criticized for attempting to police identity through a politics of purity excluding anyone who doesn't share the same narrative Theoretically a critique of essentialism has led to a suspicion against essence and origins regardless of their political implications The central argument of *Queer Roots for the Diaspora* is that in spite of these debates ultimately the desire for roots contains the roots of its own deconstruction The book considers alternative root narratives that acknowledge the impossibility of returning to origins with any certainty welcome sexual diversity acknowledge their own fictionality reveal that even a single collective identity can be rooted in multiple ways and create family trees haunted by the queer others patrilineal genealogy seems to marginalize The roots narratives explored in this book simultaneously assert and question rooted identities within a number of diasporas African Jewish and Armenian By looking at these together one can discern between the local specificities of any single diaspora and the commonalities inherent in diaspora as a global phenomenon This comparatist interdisciplinary study will interest scholars in a diversity of fields including diaspora studies postcolonial studies LGBTQ studies French and Francophone studies American studies comparative literature and literary theory *Political Handbook of the World 2015* Tom Lansford,2015-03-24 The *Political Handbook of the World* provides timely thorough and accurate political information with more in depth coverage of current political controversies than any other reference guide The updated 2015 edition will continue to be the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup Compiling in one place more than 200 entries on countries and territories throughout the world this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system It also provides names of key ambassadors and international memberships of each country plus detailed profiles of more than 30 intergovernmental organizations and UN agencies And this annual update includes coverage of current events issues crises and controversies from the course of this year *Medical Virology 9* Luis M.
