Comprehensive Quality by Design for Pharmaceutical Product Development and Manufacture Gintaras V. Reklaitis, Christine Seymour, Salvador García-Munoz, 2017-10-09

Covers a widespread view of Quality by Design QbD encompassing the many stages involved in the development of a new drug product The book provides a broad view of Quality by Design QbD and shows how QbD concepts and analysis facilitate the development and manufacture of high quality products QbD is seen as a framework for building process understanding for implementing robust and effective manufacturing processes and provides the underpinnings for a science based regulation of the pharmaceutical industry Edited by the three renowned researchers in the field Comprehensive Quality by Design for Pharmaceutical Product Development and Manufacture guides pharmaceutical engineers and scientists involved in product and process development as well as teachers on how to utilize QbD practices and applications effectively while complying with government regulations The material is divided into three main sections the first six chapters address the role of key technologies including process modeling process analytical technology automated process control and statistical methodology in supporting QbD and establishing the associated design space The second section consisting of seven chapters present a range of thoroughly developed case studies in which the tools and methodologies discussed in the first section are used to support specific drug substance and drug product QbD related developments The last section discussed the needs for integrated tools and reviews the status of information technology tools available for systematic data and knowledge management to support QbD and related activities Highlights Demonstrates Quality by Design QbD concepts through concrete detailed industrial case studies involving of the use of best practices and assessment of regulatory implications Chapters are devoted to applications of QbD methodology in three main processing sectors drug substance process development oral drug product manufacture parenteral product processing and solid liquid processing Reviews the spectrum of process model types and their relevance the range of state of the art real time monitoring tools and chemometrics and alternative automatic process control strategies and methods for both batch and continuous processes The role of the design space is demonstrated through specific examples and the importance of understanding the risk management aspects of design space definition is highlighted Comprehensive Quality by Design for Pharmaceutical Product Development and Manufacture is an ideal book for practitioners researchers and graduate students involved in the development research or studying of a new drug and its associated manufacturing process

Production Chemicals for the Oil and Gas Industry, Second Edition Malcolm A. Kelland, 2014-03-13

Production chemistry issues result from changes in well stream fluids both liquid and gaseous during processing Since crude oil production is characterized by variable production rates and unpredictable changes to the nature of the produced fluids it is essential for production chemists to have a range of chemical additives available for rectifying issues that would not otherwise be fully resolved Modern production methods the need to upgrade crude oils of variable

quality and environmental constraints demand chemical solutions Thus oilfield production chemicals are necessary to overcome or minimize the effects of the production chemistry problems Production Chemicals for the Oil and Gas Industry Second Edition discusses a wide variety of production chemicals used by the oil and gas industry for down hole and topside applications both onshore and offshore Incorporating the large amount of research and applications since the first edition this new edition reviews all past and present classes of production chemicals providing numerous difficult to obtain references especially SPE papers and patents Unlike other texts that focus on how products perform in the field this book focuses on the specific structures of chemicals that are known to deliver the required or desired performance information that is very useful for research and development Each updated chapter begins by introducing a problem such as scale or corrosion for which there is a production chemical The author then briefly discusses all chemical and nonchemical methods to treat the problem and provides in depth descriptions of the structural classes of relevant production chemicals He also mentions when available the environmental properties of chemicals and whether the chemical or technique has been successfully used in the field This edition includes two new chapters and nearly 50 percent more references Cereal Grains Sergio O. Serna-Saldivar, 2016-04-19 While cereals remain the world's largest food yield with more than 2.3 billion metric tons produced annually consumer demands are on the rise for healthier cereal products with greater nutrition Cereal Grains Properties Processing and Nutritional Attributes provides a complete exploration of the scientific principles related to domestication New Issues in Food Policy, Control and Research Arthur P. Riley, 2007 This book examines in detail food policy control and research **Agricultural Research**, 1960 **Cereal-Based Foodstuffs: The Backbone of Mediterranean Cuisine** Fatma Boukid, 2021-04-19 Cereal Based Foodstuffs The Backbone of the Mediterranean provides an overview of cereal based products in the Mediterranean region illustrating the spectrum of products from past to present and their various processing methods The text explores new and understudied market trends in cereal based products such as cereal pulse blends pulse pastas and flat breads Chapters cover products originating in North Africa such as bulgur and couscous which are consumed worldwide but underrepresented in the scientific literature Contributing authors also offer a legislative perspective on issues of food safety the European Food Safety Association's definition of novel foods and the position of traditional foods in the Mediterranean food industry This wide ranging text thus serves members of both the scientific and industrial community seeking better coverage of global cereal product trends
