Marxism The Philosophy Of Science:

Marxism and the Philosophy of Science: The first hundred years Helena Sheehan,1985 *Marxism and the Philosophy of Science* Helena Sheehan,1993-01-01 This work approaches Marxism from the perspective of the philosophy of science Helen Sheehan aims to illuminate the complex conjuncture of science philosophy and politics within Marxism showing how Marx and Engels ideas on science had an impact on early 20th century natural philosophers The Marxist Philosophy and the Sciences J. B. S. Haldane,2016-01-29 This book first published in 1938 is based upon the Muirhead lectures on political philosophy delivered in the University of Birmingham in January and February of 1938 This title was intended to be of interest to students and scientific workers in the belief that Marxism will prove valuable to them in their scientific work as well as to a wider audience

Marxism and the Philosophy of Science Helena Sheehan,2018-01-23 A masterful survey of the history of Marxist philosophy of science Sheehan retraces the development of a Marxist philosophy of science through detailed and highly readable accounts of the debates that shaped it Skilfully deploying a large cast of characters Sheehan shows how Marx and Engel s ideas on the development and structure of natural science had a crucial impact on the work of early twentieth century natural philosophers historians of science and natural scientists With a new afterword by the author

Marxism and the Philosophy of Science Helena Sheehan,1993 Skillfully deploring a large cast of characters Sheehan retraces the development of Marxist philosophy of science through detailed and highly readable accounts of the debates that have characterized it The opening chapter discussed the ideas of Marx and Engels and the second Marxist theoreticians of the Second International In the third chapter Sheehan covers Russian Marxism up to World War II Sheehan concludes with a close analysis of the development of the debate among non Soviet Marxists placing particular emphasis on the contributions of leading British in the 1930s **Soviet Marxism and Natural Science** David Joravsky,2013-04-15 Originally published in 1961 Russian Marxist philosophy of science originated among men and women who gave their whole lives to rebellion against established authority The original tension within Marxist philosophy between positivism and metaphysics was repressed but not resolved in this first phase of Soviet Marxism In this volume the author correlates the development of ideas with trends in the Cultural Revolution and against this background it is possible to understand why debates over general philosophy gave way to conflicts over specific sciences in the aftermath of the first Five Year Plan and why there was a genuine crisis in Soviet biology

Marxism, Science, and the Movement of History Alan R. Burger,Hyman R. Cohen,David H. DeGrood,1980 Reconsideration of Science and Technology I Liu Dachun,Wang Bolu,Ding Junqiang,Liu Yongmou,2022-09-30 This volume analyzes Karl Marx s understanding of science and technology and how it is associated with his focus on the perspective of history and human practice seeking to illuminate a renewed understanding of science and technology from a Marxist angle As the first volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world the book delves

into Marx's analysis of scientific and technological problems and phenomena across five chapters. The authors explain the positioning of science and technology and the Marxist theoretical perspective of history and practice from which Marx's views on science and technology derive before an examination of three focal dimensions pertaining to science and technology: productivity, technological alienation, and liberty. Not always viewed as central to Marx's works, discussions on science and technology are often underdeveloped, but a reinterpretation of Marx's thoughts on the issues corroborates the efficacy of Marxism in terms of understanding today's world and especially the development of science and technology. The volume will appeal to scholars and students interested in Marxist philosophy, the philosophy of science and technology, and topics related to scientific culture.

The Marxist Philosophy and the Sciences Haldane, 1985-01-01 Marxism and Philosophy in the Twentieth Century Richard Hudelson, 1990-09-25

Useful to both students and scholars of the social sciences and humanities, this book provides a guide to fundamental issues in twentieth-century Marxist thought. Outlining the two distinct and incompatible critiques of vulgar Marxism: Marxist Leninism and humanistic Marxism, that gained prominence in the aftermath of World War I, this book presents both an historical overview of these two dominant traditions and a critical analysis of their philosophical roots. Challenging the viewpoints of Marxist thought which have prevailed in this century, Richard Hudelson argues that the supposed philosophical breakthroughs claimed by both Marxist Leninism and humanistic Marxism rest upon flawed reasoning. With a careful critique of these prevailing views, he presents his own view, which while receptive to the social scientific work of current analytical Marxism, de-emphasizes the importance of philosophy in the study of Marxism. Hudelson contends that developments in contemporary philosophy of science will allow for an appreciation of the scientific Marxism of the Second International without recourse to the philosophical theories of humanistic Marxism and Marxist Leninism. Also using some of the more recent developments in the philosophy of science, this book makes possible a fruitful exchange between analytical Marxism and Marxist Leninism. Divided into three parts, the book first presents a historical introduction which identifies positions and arguments of historical significance. This is followed by an analytical look at various arguments to determine where the strongest position lies. Finally, the author offers some concluding remarks on the significance of his analysis for current directions within Marxist philosophy.

In three volumes, a distinguished group of scholars from a variety of disciplines in the natural and social sciences, the humanities, and the arts contribute essays in honor of Robert S. Cohen on the occasion of his 70th birthday. The range of the essays, as well as their originality and their critical and historical depth, pay tribute to the extraordinary scope of Professor Cohen's intellectual interests as a scientist, philosopher, and a humanist, and also to his engagement in the world of social and political practice. in Honor of Robert S Cohen an international group of scholars philosophers sociologists historians and political scientists discuss issues at the cutting edge of contemporary social and political thought and its bearing on science Several essays discuss the relations of Marxism to science and specifically to the philosophies of science of Carnap and Popper as well as Soviet Marxism and the effects of Stalinism on Soviet science There are also essays on the philosophy and methodology of the social sciences on questions of method and aim in historical narrative on the issue of cultural relativism and more

Louis Althusser and the Traditions of French Marxism William Lewis, 2005-10-17 Throughout the course of the twentieth century communism has enjoyed direct competition with all other governmental and economic systems Often communist countries produced their own special brand of party intellectual These figures rightly occupied their place within their own national context and within the context of the International Some communist intellectuals through the high level of erudition exhibited in their writing have received a wider reception despite their direct linkage to party politics e.g. Antonio Gramsci, Georg Lukacs and Victor Serge are good examples After 1956 when Khrushchev exposed Stalin's atrocities to the Twentieth Congress of the Communist Party of the Soviet Union and as a result to the entire world Marxist philosophy was widely discredited It had been assumed that Stalin's excesses were somehow encouraged or supported through Marx's thought When in the mid 1960s Louis Althusser first offered his re-readings of Marx's philosophy it and communist political practice were in ruin However Althusser was in a unique cultural and historical position Thinking and writing concomitant with the structuralists and poststructuralists in France and also having access to certain theoretical tools while simultaneously committing himself entirely to Marxist thought Althusser was conceivably the last of his tradition He was a Marxist philosopher who unlike Sartre at the end of his life did not abandon communism to for instance existentialism In *Louis Althusser and the Traditions of French Marxism* William Lewis gives readers a striking example of intellectual biography and critical theory His approach considering the work and life of Althusser within French Marxism and French intellectual culture fills a void in contemporary scholarship But much more importantly Lewis is able to show how Althusser's thought is the result of and a response to specific French intellectual and political traditions of reading Marx It is through this combination of concerns

The History of Philosophy Alan Woods, Alan Woods outlines the development of philosophy from the ancient Greeks all the way through to Marx and Engels who brought together the best of previous thinking to produce the Marxist philosophical outlook which looks at the real material world not as a static immovable reality but one that is constantly changing and moving according to laws that can be discovered It is this method which allows Marxists to look at how things were how they have become and how they are most likely going to be in the future in a long process which started with the early primitive humans in their struggles for survival through to the emergence of class societies all as part of a process towards greater and greater knowledge of the world we live in This long historical process eventually created the material conditions which allow for an end to class divisions and the flowering of a new society where humans will achieve true freedom where no human will exploit another no human will oppress another Here we see how philosophy becomes an indispensable tool in the struggle for

the revolutionary transformation of society
