**The Moral Disarmament of France** Mona L. Siegel, 2004-12-02 Publisher Description **The Extreme Right in Interwar France** Samuel Kalman, 2016-12-05 Historians of the French extreme right frequently denote the existence of a strong xenophobic and nationalist tradition dating from the 1880s a perpetual anti republicanism which pervaded twentieth century political discourse Much attention is habitually paid to the interwar era deemed the zenith of this success when the leagues attracted hundreds of thousands of members and enjoyed significant political acclaim Most works on the subject speak of the French right or French fascism presenting compendia of figures and organizations from the Dreyfus Affair in the 1890s through the notorious Vichy regime the authoritarian construct which emerged following the defeat to Nazi Germany in June 1940 However historians rarely discuss the programmatic elements of extreme right wing doctrine which demanded the eradication of parliamentary democracy and the transformation of the nation and state according to group principles Instead most detail the organization and membership of various organizations and often recount their quotidian activities as political actors within and in opposition to the Third Republic This book offers a new interpretation of the extreme right in interwar French politics focusing upon the largest and most influential such groups in 1920s and 1930s the Faisceau and the Croix de Feu It explores their designs for extensive political economic and social renewal a project that commanded significant attention from the leadership and rank and file of both organizations providing the overarching goal behind their aspiration to power The book examines five components of these efforts A renewal of politics and government the establishment of a new economic order a revaluation of gender and familial relations the role of youth in the new socio political construct and the politics of exclusion inherent in every facet of Faisceau and CDF doctrine In so doing it contributes to a historical understanding of the programmatic elements of the interwar extreme right while simultaneously situating its most prominent exponents within their broader historical context [Radio and the Politics of Sound in Interwar France, 1921-1939](#)

Rebecca Scales, 2016-02-24 Explores how radio broadcasting and the emerging audio culture transformed the dynamics of French politics during the tumultuous interwar decades **Remembering Palestine in 1948** Efrat Ben-Ze'ev, 2011-02-07 The war of 1948 in Palestine is a conflict whose history has been written primarily from the national point of view This book asks what happens when narratives of war arise out of personal stories of those who were involved stories that are still unfolding Efrat Ben Ze ev examines the memories of those who participated and were affected by the events of 1948 and how these events have been mythologized over time This is a three way conversation between Palestinian villagers Jewish Israeli veterans and British policemen who were stationed in Palestine on the eve of the war Each has his or her story to tell These small scale truths shed new light on the Palestinian Israeli conflict as it was then and as it has become

**Debating the Woman Question in the French Third Republic, 1870-1920** Karen Offen, 2018-01-11 Karen Offen offers a magisterial reconstruction and analysis of the debates around relations between women and men how they are

constructed and how they should be organized that raged in France and its French speaking neighbors from 1870 to 1920. The woman question encompassed subjects from maternity and childbirth and the upbringing and education of girls to marriage practices and property law, the organization of households, the distribution of work inside and outside the household, intimate sexual relations, religious beliefs and moral concerns, government sanctioned prostitution, economic and political citizenship and the politics of population growth. The book shows how the expansion of economic opportunities for women and the drop in the birth rate further exacerbated the debates over their status, roles and possibilities. With the onset of the First World War, these debates were temporarily placed on hold but they would be revived by 1916 and gain momentum during France's post war recovery.

**The Return of Alsace to France, 1918-1939** Alison Carroll, 2018. In 1918 the end of the First World War triggered the return of Alsace and Lorraine to France after almost fifty years of annexation into the German Empire. Enthusiastic crowds in Paris and Alsace celebrated the return of the lost provinces but return proved far more difficult than expected. Over the following two decades politicians, administrators, industrialists, cultural elites and others grappled with the question of how to make the region French again. Differences of opinion emerged and reintegration rapidly descended into a multi faceted struggle as voices at the Parisian centre, the Alsatian periphery and outside France's borders offered their views on how to introduce French institutions and systems into its lost borderland. Throughout these discussions the border itself shaped the process of reintegration by generating contact and tensions between populations on the two sides of the boundary line and by shaping expectations of what it meant to be French and Alsatian. *Borderland* is the first comprehensive account of the return of Alsace to France which treats the border as a driver of change. It draws upon national, regional and local archives to follow the difficult process of Alsace's reintegration into French society, culture, political and economic systems and legislative and administrative institutions. It connects the microhistory of the region with the macro levels of national policy, international relations and transnational networks and with the cross border flows of ideas, goods, people and cultural products that shaped daily life in Alsace as its population grappled with the meaning of return to France. In revealing the multiple voices who contributed to the region's reintegration it underlines the ways in which regional populations and cross border interactions have forged modern nations.

**Maxime Weygand** Barnett Singer, 2008-06-02. During the armistice proceedings and at the Peace Conference after World War I, French General Maxime Weygand served as chief aid to Marshal Foch. Called out of retirement in the late 1930s, Weygand again served his country during World War II, becoming commander in chief of the French Army. His call for enhanced French unity, military preparedness and adaptation to a new kind of war dominated by tank mobility might have saved France the humiliating defeat in 1940 at the hand of the Nazis had it been heeded. Weygand's recognition of the Nazi threat earned him the respect of Winston Churchill and Franklin Roosevelt. Weygand's Vichy Resistance led to his imprisonment from late 1942 through the end of the war. French archival sources available, oral testimony and Weygand's private papers contribute to a fascinating biography of one of World War II's

unsung heroes

**The War Guilt Problem and the Ligue des droits de l'homme, 1914-1944** Norman

Ingram, 2019-01-31 The War Guilt Problem and the Ligue des droits de l'homme is a significant new volume from Norman Ingram addressing the history of the Ligue des droits de l'homme LDH an organisation founded in 1898 at the height of the Dreyfus Affair and which lay at the very centre of French Republican politics in the era of the two world wars Ingram posits that the Ligue's inability to resolve the question of war guilt from the Great War was what led to its decline by 1937 well before the Nazi invasion of May 1940 As well as developing our understanding of how the issue of war origins and war guilt transfixed the LDH from 1914 down to the Second World War this volume also explores the aetiology of French pacifism expanding on the differences between French and Anglo American pacifism It argues that from 1916 onwards one can see a principled dissent from the Union sacrée war effort that occurred within mainstream French Republicanism and not on the syndicalist or anarchist fringes Based on substantial research in a large number of French archives primarily in the papers of the LDH which were repatriated to France from the former Soviet Union in late 2001 but also on considerable new research in the German archives the book proposes a new explanatory model to help us understand some of the choices made in Vichy France moving beyond the usual triptych of collaboration resistance or accommodation

**The Extreme Right in the French Resistance** Valerie Deacon, 2016-12-07 In the aftermath of World War II historical accounts and public commentaries enshrined the French Resistance as an apolitical unified movement committed to upholding human rights equality and republican values during the dark period of German occupation Valerie Deacon complicates that conventional view by uncovering extreme right participants in the Resistance specifically those who engaged in conspiratorial anti republican and quasi fascist activities in the 1930s but later devoted themselves to freeing the country from Nazi control The political campaigns of the 1930s against communism republicanism freemasonry and the government taught France's ultra right wing groups to organize underground movements When France fell to the Germans in 1940 many activists unabashedly cited previous participation in groups of the extreme right as their motive for joining the Resistance Deacon's analysis of extreme right participation in the Resistance supports the view that the domestic situation in Nazi controlled France was more complex than had previously been suggested Extending beyond past narratives Deacon details how rightist resisters navigated between different options in the changing political context In the process she refutes the established view of the Resistance as apolitical united and Gaullist The Extreme Right in the French Resistance highlights the complexities of the French Resistance what it meant to be a resister and how the experiences of the extreme right proved incompatible with the postwar resistance narrative

Fellow Travellers Thomas Beaumont, 2019 Fellow Travellers considers the origins and development of the Communist presence among French railway workers how Communist activists adapted to the particular environment of railway industrial relations and examines the foundations of what was to become one of the most powerful and enduring constituencies of Communist support in modern France

**The Best Weapon for Peace** Erica

Moretti,2021-08-10 The Italian educator and physician Maria Montessori is best known for the teaching method that bears her name but historian Erica Moretti reframes Montessori's work showing that pacifism was the foundation of her pioneering efforts in psychiatry and pedagogy      The Origins of the Contemporary Global Order Carl J. Strikwerda,2025-01-17 This book offers a new interpretation of the origins of the contemporary global order the set of institutions and international practices created by the USA and its allies after the Second World War Previous interpretations have argued that the USA played the predominant role in creating the global order to fight the Cold War against the Soviet Union The author argues that a broader perspective is necessary to understand both the origins of the global order and its ongoing tensions up until today a perspective that includes the legacy of both world wars the role of imperialism and the alternative strategy of globally oriented economic blocs The cooperative tradition in the founding of the global order and the contributions of nations besides the USA provides useful insights for those interested in the current global order and the challenges it faces from Russia and China      **The French-German Dynamic in an Age of Conflict, 1925-1963** Elana Passman,2025-02-04 This book investigates the radical transformation of the relationship between Germany and France neighbors whose border constituted one of the deepest fault lines of European history For generations the French and the Germans believed they were eternal enemies and this myth of primordial hatred was the lens through which they interpreted each other's every move Yet today a Franco German war is unimaginable Passman locates the reshaping of the French German dynamic in the civic organizations that made the very notion of cooperation credible After World War I and in the decades to follow Franco German associations kept calling for an end to their animus Through journals cultural exchanges events and charitable ventures activists opened up the possibility of imagining friendship with the enemy The pursuit of French German cooperation did not begin with politicians after World War II It took flight in the 1920s and persisted through decades of turmoil In anchoring the history of collaboration in a longer arc of French German cooperation Passman illuminates how entangled were the histories of 1920s rapprochement Nazi era collaborationism and postwar reconciliation This volume will appeal to scholars students and general readers interested in the histories of modern France and modern Germany European integration and peace studies      **Raising Citizens in the 'Century of the Child'** Dirk Schumann,2010-09-01 The 20th century declared at its start to be the Century of the Child by Swedish author Ellen Key saw an unprecedented expansion of state activity in and expert knowledge on child rearing on both sides of the Atlantic Children were seen as a crucial national resource whose care could not be left to families alone However the exact scope and degree of state intervention and expert influence as well as the rights and roles of mothers and fathers remained subjects of heated debates throughout the century While there is a growing scholarly interest in the history of childhood research in the field remains focused on national narratives This volume compares the impact of state intervention and expert influence on theories and practices of raising children in the U S and German Central Europe In particular the contributors focus on institutions such as kindergartens and

schools where the private and the public spheres intersected on notions of race and ethnicity normality and deviance and on the impact of wars and changes in political regimes
