More Humane Medicine A Liberal Catholic Bioethics:

A Liberal Catholic Bioethics James F. Drane, 2010 A Liberal Catholic Bioethics opens a new dialogue between Christian reasoning and belief and secular positions in bioethics The well documented book covers in detail internal and external debates and positions of Roman Catholic theology and hierarchy issues of contraception and abortion palliative care and euthanasia caring humanely for the demented the use and abuse of modern technology in medicine The doctrine of Papal infallibility is identified as a main reason in hindering and suppressing a dialogue within the church with the faithful and with other religious and humanist positions Were the Borgia Popes infallible was Pope Urban infallible when he condemned Galileo the author asks He thus carries the debate far beyond specific bioethics issues towards a more humane medicine and culture

Bioethical and Evolutionary Approaches to Medicine and the Law W. Noel Keyes, 2007 Bioethics is a multidisciplinary field of law and one that can not be ignored Bioethical and Evolutionary Approaches to Medicine and the Law is a comprehensive scholarly analysis of bioethics and the development of its standards The book is broken up into the following four parts Part I deals with scientific religious ethical and legal aspects of bioethics Part II evaluates 100 current bioethical issues and sets forth specific approaches for their resolution Part III focuses on medical legal and other problems from beginning of life overpopulation birth control in vitro fertilization etc through end of life physician assisted suicide advance directives euthanasia etc Part IV discusses the major bioethical issues in genetics and genetic engineering

Medicine, Ethics and Religion James F. Drane ,2018-07 Medicine Ethics Religion addresses three topics that inevitably will be confronted at some level in every human life Academic understanding of all three fields provides background for entering the field of medicine Understanding of Bioethics is part of every contemporary student s higher education The discipline is presented as an important background understanding of contemporary culture for students This textbook is required reading for an entry level course in bioethics or for an introductory philosophy course with a focus on medicine It may also help readers to understand their own lives adding the religious dimension to the practice of medicine The doctor patient relationship an analysis of contemporary culture the impact of technology on human life and the interfaces between medical practice bioethics and religion are core themes of this volume

Ibero-American Bioethics Léo Pessini, Christian Paul de Barchifontaine, Fernando Lolas Stepke, 2009-12-16 This book is the first in a series of planned volumes focused on preserving the character of the development of bioethics in particular cultural contexts As the first of these volumes Leo Pessini Christian de Paul de Barchifontaine and Fernando Lolas Stepke s work has succeeded well It has brought together accounts by scholars who were crucial to the emergence of bioethics in the Ibero American cultural domain This trail blazing work in the history of bioethics will be of enduring significance I am deeply in their debt for having shouldered this far from easy task Bioethics is the product of very particular socio historical developments Most prominent among them have been 1 the secularization of the dominant culture of North America Western Europe and now Central and South America as well 2 a

deflation of the status and authority of physicians as moral authorities able to guide their own profession and 3 the salience of a post traditional animus that gives central place to persons as isolated atomic sources of moral authority Bioethics initially took shape in North America as a post Christian post professional post traditional social movement This bioethics sought to establish a moral discourse for the public forum a moral practice able to give practical guidance in hospitals and other institutions and a body of undergirding and justifying theoretical reflections

Biomedicine and Beatitude Nicanor Pier Giorgio Austriaco, 2021-06-25 This timely and up to date new edition of Biomedicine and Beatitude features an entirely new chapter on the ethics of bodily modification It is also updated throughout to reflect the pontificate of Pope Francis recent concerns including ethical issues raised by the COVID 19 pandemic and feedback from the many instructors who used the first edition in the classroom

Catholic Moral Theology in the United States Charles E. Curran, 2008-04-11 In this magisterial volume Charles E Curran surveys the historical development of Catholic moral theology in the United States from its 19th century roots to the present day He begins by tracing the development of pre Vatican II moral theology that with the exception of social ethics had the limited purpose of training future confessors to know what actions are sinful and the degree of sinfulness Curran then explores and illuminates the post Vatican II era with chapters on the effect of the Council on the scope and substance of moral theology the impact of Humanae vitae Pope Paul VI's encyclical condemning artificial contraception fundamental moral theology sexuality and marriage bioethics and social ethics Curran's perspective is unique For nearly 50 years he has been a major influence on the development of the field and has witnessed first hand the dramatic increase in the number and diversity of moral theologians in the academy and the Church No one is more qualified to write this first and only comprehensive history of Catholic moral theology in the United States

The Scientific Conquest of Death Immortality Institute, 2004 Nineteen scientists doctors and philosophers share their perspective on what is arguably the most significant scientific development that humanity has ever faced the eradication of aging and mortality This anthology is both a gentle introduction to the multitude of cutting edge scientific developments and a thoughtful multidisciplinary discussion of the ethics politics and philosophy behind the scientific conquest of aging

The Future Church John L. Allen, Jr., 2012-01-24 One of the world's foremost religion journalists offers an unexpected and provocative look at where the Catholic Church is headed and what the changes will mean for all of us What will the Catholic Church be like in 100 years Will there be a woman pope Will dioceses throughout the United States and the rest of the world go bankrupt from years of scandal In THE FUTURE CHURCH John L Allen puts forth the ten trends he believes will transform the Church into the twenty second century From the influence of Catholics in Africa Asia and Latin America on doctrine and practices to the impact of multinational organizations on local and ethical standards Allen delves into the impact of globalization on the Roman Catholic Church and argues that it must rethink fundamental issues policies and ways of doing business Allen shows that over the next century the Church will have to respond to changes within the institution itself and in the world as a whole

whether it is contending with biotechnical advances including cloning and genetic enhancement the aging Catholic population or expanding the roles of the laity Like Thomas Friedman's *The World Is Flat* THE FUTURE CHURCH establishes a new framework for meeting the challenges of a changing world *Design and Destiny* Ronald Cole-Turner, 2008 Scholars discuss the genetic modification of embryonic cells from the viewpoints of traditional Jewish and Christian teaching considering both the possible therapeutic benefits of this technology and moral concerns about its implementation We are approaching the day when advances in biotechnology will allow parents to design a baby with the traits they want The continuing debate over the possibilities of genetic engineering has been spirited but so far largely confined to the realms of bioethics and public policy *Design and Destiny* approaches the question in religious terms discussing human germline modification the genetic modification of the embryonic cells that become the eggs or sperm of a developing organism from the viewpoints of traditional Christian and Jewish teaching The contributors leading religious scholars and writers call our attention not to technology but to humanity reflecting upon the meaning and destiny of human life in a technological age Many of these scholars argue that religious teaching can support human germline modification implemented for therapeutic reasons although they offer certain moral conditions that must be met The essays offer a surprising variety of opinions including a discussion of Judaism's traditional presumption in favor of medicine an argument that Catholic doctrine could accept germline modification if it is therapeutic for the embryo an argument implying that traditional Christian teaching permits germline modification whether for therapy or enhancement and a classical Protestant view that germline modification should be categorically opposed Contributors Lisa Sowle Cahill Nigel M de S Cameron Ronald Cole Turner Amy Michelle DeBaets Celia Deane Drummond Elliot Dorff H Tristram Engelhardt Jr Thomas A Shannon James J Walter

Applied Ethics in a World Church Linda Hogan, 2008 Dealing with such issues as globalization gender and AIDS these essays by moral theologians demonstrate the creativity dynamism and diversity of the Catholic moral tradition as it proceeds from local cultures opens itself to cross cultural conversations and progresses in a spirit of mercy and care *Conscience*, 2003 **Pot Politics** Mitch Earleywine, 2006-08-31 Marijuana use continues to attract interest and fuel controversy Big green pot leaves have adorned the covers of Time National Review and Forbes Almost 100 million Americans have tried marijuana at least once Groups such as The National Organization for the Reform of Marijuana NORML and The Marijuana Policy Project MPP have tens of thousands of members Polls suggest that 70-80% of Americans support medicinal marijuana At least 11 U S states have experimented with decriminalization and medical marijuana laws with new initiatives appearing each year Meanwhile other groups such as Partnership for a Drug Free America and Mothers Against Drugs protest legalization Clearly debate about marijuana policy shows no sign of abating In his earlier book *Understanding Marijuana* Mitch Earleywine forced researchers policy makers and citizens to avoid oversimplification separate empirical findings from their interpretations and understand that some things may be neither good nor evil Pot Politics continues with these same

themes showing multiple perspectives from a variety of experts on an important problem with vast implications The volume presents ethical religious economic psychological and political arguments for cannabis policies that range from prohibition to unrestricted legalization By presenting a unique perspective on overlapping issues each chapter demonstrates how even recognized experts draw markedly different conclusions from the same data Some contributors evaluate policy by weighing the costs and benefits of control while others eschew policy by presenting moral arguments against our attempts at control Pot Politics should be read by everyone interested in the politics of both marijuana use and governmental regulation of our actions

Un homme nouveau par le clonage? Denis Müller, Hugues Poltier, 2005 Un débat autour des problèmes moraux posés par le clonage que ce soit d'animaux ou d'être humains et du mythe de l'Homme nouveau **International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences**, 2003 **Shamanism for the Age of Science** Kenneth Smith, 2011-07-26 A practical guide to understanding and awakening the human energy body Shows how the energy body forms our reality from the infinite possibilities presented by our thoughts feelings and those around us Illustrates the anatomy of the energy body including its connections to the nervous system chakras and meridians Provides step by step exercises to awaken the energy body expand awareness and begin consciously creating your own reality At a time when consciousness and other aspects of our energetic anatomy are finding their way into modern science Kenneth Smith blends traditional shamanism with cutting edge research in bioenergetics and neuroscience to offer this user's guide to the energy body explaining what it is what its capabilities are and how to harness it as a vehicle for higher consciousness and heightened awareness For more than 5 000 years shamans of the Toltec tradition have worked with the energy body learning its structure and perceptual capacities as well as mapping it as an objective measurable part of our anatomy Drawing from his decades long involvement in this tradition and his work in the field of bioenergetics Smith explains how the energy body shapes our perceptions determines our state of consciousness and forms our reality from the infinite possibilities presented by our thoughts feelings and those around us Illustrating our energetic anatomy and its connections to the nervous system chakras and meridians he provides step by step exercises to awaken the energy body expand awareness and begin consciously creating your own reality **Medical Humanities Review**, 2003

Journal of the American Medical Association, 2004 *La conquista científica de la muerte* Crionica Org, 2008-12 Algunos de los prejuicios referentes a la inmortalidad mas profundamente arraigados en biologos profesionales son ciertamente falsos Algunos de los prejuicios mas profundamente arraigados en biologos profesionales referentes a la inmortalidad son ciertamente falsos El envejecimiento no es universal Existen organismos biologicamente inmortales DR MICHAEL R ROSE Posiblemente el mas absurdo de los argumentos en contra de la investigacion para conseguir una cura del envejecimiento humano es que extender nuestra expectativa de vida indefinidamente no seria natural de alguna manera dejariamos de ser humanos Considero que este punto de vista es absurdo DR AUBREY DE GREY En el cuerpo humano quedan reminiscencias

potenciales de nuestro legado inmortal células que tienen el potencial de no dejar tras de sí antepasados muertos células de un linaje llamado línea germinal. Estas células tienen la capacidad de la renovación inmortal tal y como se demuestra con el hecho de que los bebés nacen jóvenes y con el potencial de dar lugar algún día a sus propios bebés y estos a su vez a los suyos para siempre. DR MICHAEL D WEST Cada vez intimamos más con la tecnología. Los ordenadores empezaron siendo unas enormes máquinas remotas en habitaciones con aire acondicionado y manejados por técnicos de bata blanca. Poco a poco se fueron instalando en nuestros escritorios luego bajo el brazo como un libro y ahora ya los tenemos en los bolsillos. Muy pronto los acabaremos instalando en el cuerpo y en el cerebro. Acabaremos por ser más no biológicos que biológicos. DR RAYMOND KURZWEIL Aunque todos queremos sabiduría y riqueza, nuestra salud a menudo se agota antes de conseguirlo. Para aumentar la duración de la vida y mejorar la mente necesitaremos cambiar en el futuro tanto el cuerpo como el cerebro. Para esto debemos tener en cuenta primero como la evolución darwiniana nos ha llevado hasta donde estamos. Luego hemos de imaginar diferentes formas para reemplazar las partes gastadas de nuestro cuerpo y resolver así la mayor parte de los problemas de salud. Por tanto debemos inventar estrategias que amplíen el cerebro y nos hagan alcanzar mayor sabiduría. Eventualmente reemplazaremos el cerebro completamente usando la nanotecnología. Una vez liberados de las limitaciones de la biología seremos capaces de decidir la duración de nuestra vida con la opción de la inmortalidad y escoger entre otras capacidades inimaginables.
