group of scholars journalists and public intellectuals explores the distinctive landscape culture and history that define the northern margins of the American Midwest From the glacial past to the present day these essays range across the histories of the Dakota and Ojibwe people colonial imperial rivalries and immigration and conflicts between the economic imperatives of resource extraction and the stewardship of nature The book also considers literary treatments of the area and arguably makes its own contributions to that literature as some of the authors search for the North Country through personal essays while others highlight individuals who are identified with the area like Sigurd Olson John Barlow Martin and Russell Kirk From the fur trade to tourism fisheries to supper clubs Finnish settlers to Native treaty rights the nature of the North Country emerges here in all its variety and particularity as clearly distinct from the greater Midwest as it is part of the American heartland
