Cell-Mediated Immunity in Ruminants Bruno M. L. Goddeeris, William I. Morrison, 1994-02-28 Within the last 10 years the immune system of ruminants especially T cells and their interactions with other cells has been an important topic of study for veterinary immunologists and an area of interest for medical and fundamental immunologists This book brings together all the latest data on ruminant cell mediated immunology In the first half of the book leukocytes and their membrane molecules and cytokines are reviewed Markers tissue distribution functional characterization ontogeny cytokines and histocompatibility are covered in depth in separate chapters In the second half of the book cell mediated immune responses against infectious diseases such as East Coast fever infectious bovine rhinotracheitis foot and mouth disease maedi visna and gastrointestinal nematodes are analyzed The application of cytokines to ruminants against infectious diseases is also reviewed

*Immunological Recognition of Peptides in Medicine and Biology* N. D. Zegers, W.J.A. Boersma, Eric Claassen, 1995-07-19 Immunological Recognition of Peptides in Medicine and Biology gives a state of the art overview on the use of peptides and peptide ligand interactions and the critical role they play in recognition patterns for the regulation of various biological functions A wide range of applications are discussed including some experimental preclinical ones such as epitope mapping peptide libraries and production of amino acid specific antibodies and their therapeutic use in oncology and infectious disease vaccines Each chapter also includes step by step protocols to aid in actual experiments Several alternative

techniques and strategies are discussed by different authors offering the reader an opportunity to select the most favorable application for a specific biological problem

*Dynamics of the Il-2 Cytokine Network and T-cell Proliferation* Dorothea Busse,2010 This book adds to a intensively investigated question of immunological research How do regulatory T cells mediate their function to ensure tolerance against self antigen The author analyzes the interaction via the cytokine interleukin 2 between T helper cells which mediate immune responses and regulatory T cells Since both cell types depend on interleukin 2 to mediate their functions competition for interleukin 2 is likely A mathematical model is developed to describe the interaction This model focuses on the interleukin 2 receptor dynamics on helper and regulatory T cells and the extracellular interleukin 2 diffusion The interleukin 2 receptor dynamics is governed mainly by an autocrine positive feedback loop on both cell types However its differential regulation results in a switch like up regulation of the receptors on T helper cells and a gradual adaptation of the receptor levels to extracellular interleukin 2 supply on regulatory T cells This difference enables regulatory T cells to efficiently compete for interleukin 2 and deprive T helper cells of their growth factor Cell culture experiments verify these findings It can be shown that the antigen stimulus and the intercellular distance are relevant control parameters for competition Other mechanisms are described for suppression of T helper cell action by regulatory T cells competition for interleukin 2 may act in concert with them

Giannotti, Willem A. van Vloten, 2012-12-06 This book is based upon a series of papers originally presented at a NATO Advanced Studies Workshop of the same title held at the study Center HI Cappuccini a converted monastery in San Miniato a small village located between Pisa and Florence Italy in October 1991 Authors were asked to submit their completed chapters by the following February these were then scanned onto computer disks edited and returned to the authors for final revision and updating with a final deadline of February 1993 The authors were encouraged to make whatever modifications they wanted especially regarding updating their chapters with an eye to making the final product both comprehensive and current In this we succeeded beyond our expectations with most chapters extensively altered and many completely re written and significantly expanded Thus although the original meeting was held in 1991 the chapters in this volume may be regarded as current from at least February 1993 with some of the final updated revisions received as late as July 1993 This book as agreed in our original contract has been delivered to the publisher camera ready This means that all of the scanning editing proofing and typesetting were done here by the office of the Department of Dermatology at the New Jersey Medical School We essentially produced the book which the publisher for the most part then photocopied This has been an enormous burden borne mainly by my colleague in this division Robert A **Advances in Mucosal Immunology** Jiri Mestecky, Michael W. Russell, Susan Jackson, Suzanne M. Michalek, Helena Tlaskalová-Hogenová, Jaroslav Sterzl, 2013-04-17 The Seventh International Congress of Mucosal Immunology held in Prague the beautiful old capital of The Czech Republic 16-20 August 1992 was the first to be sponsored by the Society for Mucosal Immunology and was the largest since their inception 20 years earlier in Birmingham Alabama It was attended by 624 participants who gave 538 presentations more than 10 times the numbers of the first meeting these proceedings contain 354 papers that were submitted for publication The political events in Europe that made it possible to hold this Congress in Prague also allowed for the first time the participation of large numbers of scientists from Eastern Europe as well as from Asia and the organizers were truly gratified by this happy circumstance It is now clear not only that mucosal immunity encompasses the huge area of mucosal surfaces and most physiological organ systems but also that mucosal immunology extends over the whole global surface and all continents The sheer size of the Congress and number of manuscripts unfortunately entailed some unexpected problems in editing and assembling the proceedings partly due to the diversity of linguistic styles not represented at earlier meetings and we apologize to the authors who have patiently awaited the publication of their contributions **Research Grants Index** National Institutes of Health (U.S.).
