Machine Interpretation Of Line Drawing Images Technical Drawings Maps And Diagrams:

Machine Interpretation of Line Drawing Images Sergey Ablameyko, Tony Pridmore, 2012-12-06 Line drawing interpretation is a challenging area with enormous practical potential At present many companies throughout the world invest large amounts of money and human resource in the input of paper drawings into computers The technology needed to produce an image of a drawing is widely available but the transformation of these images into more useful forms is an active field of research and development Machine Interpretation of Line Drawing Images describes the theory and practice underlying the computer interpretation of line drawing images and shows how line drawing interpretation systems can be developed The authors show how many of the problems can be tackled and provide a thorough overview of the processes underpinning the interpretation of images of line drawings

Recent Advances and Perspectives Josep Lladós, Young-Bin Kwon, 2004-09-23 1

This book contains refereed and improved papers presented at the 5th International Workshop on Graphics Recognition GREC 2003 GREC 2003 was held in the Computer Vision Center in Barcelona Spain during July 30 31 2003

The GREC workshop is the main activity of the IAPR TC10 the Technical 2 Committee on Graphics Recognition Edited volumes from the previous two shops in the series are available as Lecture Notes in Computer Science LNCS Volume 1072 GREC 1995 at Penn State University USA LNCS Volume 1389 GREC 1997 in Nancy France LNCS Volume 1941 GREC 1999 in Jaipur India and LNCS Volume 2390 GREC 2001 in Kingston Canada Graphics recognition is a particular field in the domain of document analysis that combines pattern recognition and image processing techniques for the analysis of any kind of graphical information in documents either from paper or electronic formats Topics of interest for the graphics recognition community are vectorization symbol recognition analysis of graphic documents with a grammatic notation like electrical diagrams architectural plans engineering drawings musical scores maps etc graphics based information retrieval performance evaluation in graphics recognition and systems for graphics recognition In addition to the classic objectives in recent years graphics recognition has faced up to new and promising perspectives some of them in conjunction with other scientific communities Examples of that are sketchy interfaces and on line graphics recognition in the framework of human computer interaction or query by graphic content for retrieval and browsing in large format graphic documents digital libraries and Web applications Thus the combination of classic challenges with new research interests gives the graphics recognition field an active scientific community with a promising future

Image Analysis And Recognition Mohamed Kamel, Aurélio Campilho, 2005-09-15 ICIAR 2005 the International Conference on Image Analysis and Recognition was the second ICIAR conference and was held in Toronto Canada ICIAR is organized annually and alternates between Europe and North America ICIAR 2004 was held in Porto Portugal The idea of organizing these conferences came as a result of discussion between researchers in Portugal and Canada to encourage collaboration and exchange mainly between these two countries but also with the open participation of other countries addressing recent advances in theory methodology and applications The response to the call for papers for ICIAR 2005 was encouraging From 295 full papers submitted 153 were finally accepted 80 oral presentations and 73 posters The review process was carried out by the Program Committee members and other reviewers all are experts in various image analysis and recognition areas Each paper was reviewed by at least two reviewers and also checked by the conference co chairs The high quality of the papers in these proceedings is attributed first to the authors and second to the quality of the reviews provided by the experts We would like to thank the authors for responding to our call and we wholeheartedly thank the reviewers for their excellent work and for their timely response It is this collective effort that resulted in the strong conference program and high quality proceedings in your hands

Graphics Recognition. Algorithms and Applications Dorothea Blostein, Young-Bin Kwon, 2003-06-30 This book presents refereed and revised papers presented at GREC 2001 the 4th IAPR International Workshop on Graphics Recognition which took place in Kingston Ontario Canada in September 2001 Graphics recognition is a branch of document image analysis that focuses on the recognition of two dimensional notations such as engineering drawings maps mathematical notation music notation tables

and chemical structure diagrams Due to the growing demand for both off line and on line document recognition systems the field of graphics recognition has an exciting and promising future The GREC workshops provide an opportunity for researchers at all levels of experience to share insights into graphics recognition methods The workshops enjoy strong participation from researchers in both industry and academia They are sponsored by IAPR TC 10 the Technical Committee on Graphics Recognition within the International Association for Pattern Recognition Edited volumes from the previous three workshops in this series are available as Lecture Notes in Computer Science Vols 1072 1389 and 1941 After the GREC 2001 workshop authors were invited to submit enhanced versions of their papers for review Every paper was evaluated by three reviewers We are grateful to both authors and reviewers for their careful work during this review process Many of the papers that appear in this volume were thoroughly revised and improved in response to reviewers suggestions

Graphics Recognition. Ten Years Review and Future Perspectives Wenyin Liu, 2006-07-26 This book constitutes the thoroughly refereed post proceedings of the 6th International Workshop on Graphics Recognition GREC 2005 held in Hong Kong China August 2005 The book presents 37 revised full papers together with a panel discussion report organized in topical sections on engineering drawings vectorization and recognition symbol recognition graphic image analysis structural document analysis sketching and online graphics recognition curves and shape processing and graphics recognition contest results
