

Mars The Red Planet

David Jefferis

Mars The Red Planet:

The Case For Mars Robert Zubrin, 2012-12-11 Since the beginning of human history Mars has been an alluring dream the stuff of legends gods and mystery The planet most like ours it has still been thought impossible to reach let alone explore and inhabit Now with the advent of a revolutionary new plan all this has changed Leading space exploration authority Robert Zubrin has crafted a daring new blueprint Mars Direct presented here with illustrations photographs and engaging anecdotes The Case for Mars is not a vision for the far future or one that will cost us impossible billions It explains step by step how we can use present day technology to send humans to Mars within ten years actually produce fuel and oxygen on the planet s surface with Martian natural resources how we can build bases and settlements and how we can one day terraform Mars a process that can alter the atmosphere of planets and pave the way for sustainable life **Mars** Leonard David, 2016 The next frontier in space exploration is Mars the red planet and human habitation of Mars isn t much farther off Now the National Geographic Channel goes years fast forward with Mars a six part series documenting and dramatizing the next 25 years as humans land on and learn to live on Mars This companion book to the series explores the science behind the mission and the challenges awaiting those brave individuals Filled with vivid photographs taken on Earth in space and on Mars arresting maps and commentary from the world s top planetary scientists this fascinating book will take you millions of miles away and decades into the future to our next home in the solar system **Mars** Lincoln James, 2010-08-01 Discusses one of the solar system s most interesting locations Mars Discovering Mars William Sheehan, Jim Bell, 2021-11-09 For millenia humans have considered Mars the most fascinating planet in our solar system We ve watched this Earth like world first with the naked eye then using telescopes and most recently through robotic orbiters and landers and rovers on the surface Historian William Sheehan and astronomer and planetary scientist Jim Bell combine their talents to tell a unique story of what we ve learned by studying Mars through evolving technologies What the eye sees as a mysterious red dot wandering through the sky becomes a blurry mirage of apparent seas continents and canals as viewed through Earth based telescopes Beginning with the Mariner and Viking missions of the 1960s and 1970s space based instruments and monitoring systems have flooded scientists with data on Mars s meteorology and geology and have even sought evidence of possible existence of life forms on or beneath the surface This knowledge has transformed our perception of the Red Planet and has provided clues for better understanding our own blue world Discovering Mars vividly conveys the way our understanding of this other planet has grown from earliest times to the present The story is epic in scope an Iliad or Odyssey for our time at least so far largely without the folly greed lust and tragedy of those ancient stories Instead the narrative of our quest for the Red Planet has showcased some of our species most hopeful attributes curiosity cooperation exploration and the restless drive to understand our place in the larger universe Sheehan and Bell have written an ambitious first draft of that narrative even as the latest chapters continue to be added both by researchers on Earth and our robotic emissaries on and around

Mars including the latest the Perseverance rover and its Ingenuity helicopter drone which set down in Mars's Jezero Crater in February 2021

Uncovering the Secrets of the Red Planet Paul Raeburn, 1998 Contains over 125 photographs transmitted from the surface of Mars in 1997 by NASA's Pathfinder spacecraft and includes discussions of the history and future of Mars exploration

Mars Michelle Lomborg, John Willis, 2016-05 The Our Solar System series takes readers on an exciting journey through space to discover the unique characteristics of each planet This compelling series explores each planet's orbit life forms name origin and physical features along with a map showing its location in space a timeline of observation and comparisons to Earth and the other planets From rocky planets to dwarf planets and ice giants to gas giants each book in the series is filled with exciting facts that are sure to keep readers turning the pages Our Solar System is a series of AV2 media enhanced books A unique book code printed on page 2 unlocks multimedia content These books come alive with video audio weblinks slide shows activities hands on experiments and much more

Geographies of Mars K. Maria D. Lane, 2010-12-15 One of the first maps of Mars published by an Italian astronomer in 1877 with its pattern of canals fueled belief in intelligent life forms on the distant red planet a hope that continued into the 1960s Although the Martian canals have long since been dismissed as a famous error in the history of science K. Maria D. Lane argues that there was nothing accidental about these early interpretations Indeed she argues the construction of Mars as an incomprehensibly complex and engineered world both reflected and challenged dominant geopolitical themes during a time of major cultural intellectual political and economic transition in the Western world Geographies of Mars telescopes in on a critical period in the development of the geographical imagination when European imperialism was at its zenith and American expansionism had begun in earnest Astronomers working in the new observatories of the American Southwest or in the remote heights of the South American Andes were inspired Lane finds by their own physical surroundings and used representations of the Earth's arid landscapes to establish credibility for their observations of Mars With this simple shift to the geographer's point of view Lane deftly explains some of the most perplexing stances on Mars taken by familiar protagonists such as Percival Lowell Alfred Russel Wallace and Lester Frank Ward A highly original exploration of geography's spatial dimensions at the beginning of the twentieth century Geographies of Mars offers a new view of the mapping of far off worlds

Mars William Sheehan, 2010-12-08 In this engaging eloquent account of our love affair with the Red Planet Sheehan and O'Meara review the history of human fascination with our neighbor in the solar system and look at the prospects for manned space flight to Mars in this new century

Our Solar System: Mars: The Red Planet World Book, 2020-03-12 Spectacular NASA photos and illustrations inspire readers to explore the wonders of Mars

Mars David Jefferis, 2008 Describes the planet Mars its physical characteristics its moons and the history of human exploration of the planet
