

DIVISION OF LABOUR

Marx's most important theoretical contribution was his sharp distinction between the social division and the technical or economic division of labour.

That is, some forms of labour co-operation are due purely to technical necessity, but others are purely a result of a social control function related to a class and status hierarchy.

If these two divisions are conflated, it might appear as though the existing division of labour is technically inevitable and immutable, rather than socially constructed and influenced by power relationships.

Marx also suggests that the capitalist division of labour will evolve over time such that the maximum amount of labour is productive labour, where productive labour is defined as labour which creates surplus value.
