Nielson, 2000-02-28 In America s foreign affairs there has been a delicate balance between often conflicting imperatives of interests ideals and power How these

imperatives have intersected to shape the constellation of American foreign policy decisions throughout the nation's history and indeed how they have served to advance or subvert attainment of America's regional hemispheric and global ambitions is the subject of this study. This collection of essays explores seminal decisions in American foreign policy and diplomatic history from the early National period to the Vietnam War, each of which proved to be a turning point and then asks readers to consider alternative futures based upon different courses of action. Nielson underscores how history could and perhaps should have been different. U.S. foreign policy has in large measure been contingent upon decisions made by individuals in positions of power. Their personalities, characters, and assumptions about duty and America's role in the world have uniquely shaped policy choices and thus the course of foreign affairs for better or worse. This book hopes to show that history is ever fluid, unpredictable, and problematic. It will complement traditional texts as a what-if counterpoint which will stimulate interest in and speculation about leadership roles, national interest, and decision making in foreign policy.

An Alternative Path Naomi Rogers, 1998. Like many other American medical schools, Hahnemann has had its share of problems, financial and otherwise. The civil rights and radical student movements of the 1960s and 1970s, however, pushed the College into a more politically conscious view of itself as a health care provider to the inner city and as a producer of health professionals.

Forever in the Path Pero G. Dagbovie, 2025-02-01. *Forever in the Path: The Black Experience at Michigan State University* offers a sweeping overview of the Black experience at America's first agricultural college from the 1890s through the late twentieth century. In exploring the personalities, important events, and key turning points of Black life at the university, this book deftly blends intellectual history, social history, educational history, institutional history, and the African American biographical tradition. Pero G. Dagbovie depicts and imagines how his numerous subjects' upbringings and experiences at the institution informed their futures and how they benefitted from and contributed to MSU's vision, mission, and transformative role in the history of higher education. Michigan State University, founded in 1855 as the Agricultural College of the State of Michigan, has a fascinating past, a history shaped by vacillating local and national contexts as well as by people from different walks of life. The first Black students arrived on campus during the late nineteenth and early twentieth centuries, and the first full-time Black faculty member was hired in the late 1940s. Before and after the modern Civil Rights Movement, African Americans from various backgrounds were transformed by MSU while also profoundly contributing in vital ways to the institution's growth and evolving identity.
