writer reintroduces readers to The Snake encouraging our initial reaction to the slithery creature to be one of awe rather than disgust For millennia depictions of snakes as alternatively beautiful and menacing creatures have appeared in religious texts mythology poetry and beyond From the foundational deities of ancient Egypt to the reactions of squeamish children today it is a historically commonplace belief that snakes are devious dangerous and even evil But where there is hatred and fear there is also fascination and reverence How is it that creatures so despised and sinister so foreign of movement and ostensibly devoid of sociality and emotion have fired the imaginations of poets prophets and painters across time and cultures In Slither Stephen S Hall presents a naturalistic cultural ecological and scientific meditation on these loathed yet magnetic creatures In each chapter he explores a biological aspect of The Snake such as their cold blooded metabolism and venomous nature alongside their mythology artistic depictions and cultural veneration In doing so he explores not only what neurologically triggers our wary fascination with these limbless creatures but also how the current generation of snake scientists is using cutting edge technologies to discover new truths about these evolutionarily ancient creatures truths that may ultimately affect and enhance human health

Rattlesnake Bluff Cary J. Griffith, 2025-06-10 When the mysterious appearance of an endangered snake leads to murder special agent Sam Rivers must solve the case before those responsible can slither away The appearance of a rattlesnake wouldn't normally be enough to halt construction on Alta Vista an upscale housing development in Southeast Minnesota's bluff country But this is no ordinary reptile it's a rare eastern massasauga rattlesnake EMR The endangered snake has not been seen in the region for more than two decades so Sam Rivers is called in As a special agent of the US Fish and Wildlife Service Sam takes his responsibilities seriously especially when it comes to protecting endangered species and their habitats If he finds EMR dens on the construction site he'll close it permanently While the developers protest in outrage Sam enlists the help of herpetologist Gina Larkspur from the Department of Natural Resources Together they begin to find anomalies that call the entire situation into question When Sam's wolfdog Gray tries to sniff out the EMR dens it isn't rattlesnakes he finds Instead Gray discovers the remnants of a terrible 25 year old crime Were the endangered species merely pawns in a diabolical coverup As Sam searches for the truth bodies begin to pile up He and his team must race to find answers before more innocents die Natural history writer Cary J Griffith brings back Sam Rivers for his fifth outdoors themed mystery a suspenseful novel filled with fast paced action
