Reading Development in Chinese Children Catherine McBride-Chang, Hsuan-Chih Chen, 2003-12-30 This

text reviews both similarities and unique cultural linguistic and script differences of Chinese relative to alphabetic reading and even across Chinese regions Chinese reading acquisition relies upon children's strongly developing analytic skills as highlighted here These 16 chapters present state of the art research on diverse aspects of Chinese children's reading development This edited volume presents research on Chinese children's reading development across Chinese societies Authors from China Hong Kong Singapore and Taiwan among others present the latest findings on how Chinese children learn to read Reading acquisition in Chinese involves some parameters typically not encountered in some other orthographies such as English For example Chinese readers in different regions might speak different mutually unintelligible languages be taught to read with or without the aid of a phonetic coding system and learn different scripts This book both implicitly and explicitly considers these and other contextual issues in relation to developmental and cognitive factors involved in Chinese literacy acquisition One of the clearest themes to emerge from this volume is that across regions Chinese children despite lack of explicit teaching of phonetic or semantic character components learn to read largely by integrating visible print sound and print meaning connections Rather than learning to read Chinese characters by rote as is sometimes mistakenly believed these children are analytic learners Chapters in this book also cover such topics as Chinese children's reading comprehension cognitive characteristics of good and poor readers and reading strategies of bilingual and biscriptal readers This book is a useful reference for anyone interested in understanding either developing or skilled reading of Chinese or for those interested in literacy learning across cultures

The Logic of Chinese Characters Mnemonic Method for Learning Chinese Characters is a manual designed to facilitate the memorization and understanding of Chinese characters This innovative method employs various pedagogical techniques that make learning to read Chinese characters accessible to anyone Below are some of the techniques used

Sorting characters by frequency of use The book begins by teaching the most common and widely used characters so that students can quickly identify the majority of characters in various texts and contexts such as newspapers books the internet etc

Teaching pictographic characters Teaching characters that graphically represent objects is prioritized such as K u meaning mouth R n meaning man R meaning sun and Hu meaning fire These characters are easier to recognize and remember due to their visual nature

Teaching associative characters or compound ideograms The formation of characters through the combination of two or more ideographic characters is explored This approach uses historical data and imagination to make learning more interesting and natural For example the character M ng meaning bright is formed by combining R representing the sun and Yu representing the moon the two brightest celestial bodies in the sky Another example is M ng meaning bird's voice or chirp formed by the combination of K u meaning mouth and Ni o meaning bird Teaching new vocabulary derived from the combination of learned characters explaining the logic behind the union of these disyllabic words formed by two or even more characters For

example consider the character M o meaning hair and the character B meaning writing instrument Their combination gives rise to the word M ob Another illustrative case is the word Sh uj which translates as mobile phone This word results from the union of Sh u meaning hand and j meaning machine Therefore the literal translation would be machine of the hand which makes a lot of sense especially today as we always carry the mobile phone in our hand Use of simple language and visual support The book employs clear explanations and simple language to ensure understanding In addition illustrations are used to motivate the retention of characters making learning more visual and engaging In summary The Logic of Chinese Characters offers a comprehensive and user friendly approach to learning the Chinese language s writing system providing students with the necessary tools to effectively remember and understand characters
