Space, Place and Scale in the Study of Education Lorraine Symaco,Colin Brock,2017-10-02 The term space is inherently geographical Educational provision and activity takes place within spaces ranging from a room at home or in a school to a campus to an administrative area which could be a state within a country a whole country or a group of countries Such spaces are known as geographical surfaces Within these spaces the process of learning and teaching takes place at particular points that are often nodes in a network which may be formal such as a group of schools or universities or non formal such as in cyberspace Understanding what goes on depends on the scale at which it is observed ranging from individuals to global outreach Altogether this constitutes the geography of educational reality This comprehensive volume includes a theoretical background plus a sample of situations including school level policy and administration inequitable access education hubs and small states It offers an introduction to a relatively neglected member of the family of education foundation disciplines the geography of education This book was originally published as a special issue of Comparative Education

Historical Dictionary of Kenya Michael Mwenda Kithinji,2024-06-18 Kenya has a rich and complex history Due to the vast discoveries of prehistoric archaeological remains Kenya is one of the few places in the world with the largest and most complete record of human s cultural development

Furthermore the country's strategic location astride the Indian Ocean and the East African littoral attracted numerous foreigners such as the Arabs Persians Portuguese Americans British Chinese French and Germans Additionally immigrants from throughout Africa and beyond have settled in Kenya to escape conflict or political persecution while others wanted an opportunity to begin a new life As a result of being a gateway to the world the country traditionally has been one of the most important business cultural diplomatic and political centers in Africa Still Kenya like many other countries throughout the world has been plagued by an increasing array of complex economic political and social challenges Historical Dictionary of Kenya Fourth Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 500 cross referenced entries on important personalities as well as aspects of the country's politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Kenya

The Making Of The Curriculum Ivor F Goodson, 2002-11-01 The first edition of The Making of Curriculum was published in 1988 and reviewers hailed it as a seminal work in the field In that work Goodson explored a number of aspects of the so called traditional subjects and described the way they develop over time to a point where they can be promoted as academic disciplines He showed that the claim to be academic was in fact the result of a substantial political contest covering a century or more The traditional subject was in short invented The first edition of this book provided a series of challenging insights for those desiring to make sense of the current debate over schooling In this new and extended second edition Bill Pinar adds an illuminating introduction and Goodson brings his argument up to date with a discussion of the National Curriculum a contemporary initiative in the making of curriculum

School Subject Teaching Ashley Kent, 2013-12-19 Covering each of the core curriculum areas in turn this is a reference on school subject teaching The authors assess the development of teaching within each subject area since the 1944 Education Act up to the year 2000 Future challenges are also explored

Rethinking the School Curriculum John White, 2004 In 2000 the school curriculum in England was equipped for the first time in the country's history with an extensive set of aims and purposes In this book leading experts in the teaching of school subjects examine the significance of the new aims for the reform of the curriculum In two general introductory chapters John White discusses the validity of the aims and how they might be realized in schools The remainder of the book focuses on subject specific areas and how these need to be brought into line with the new aims so as to produce a more relevant and enjoyable curriculum experience for pupils including more opportunities for choice of activities The book concludes with suggestions about how government policy on the curriculum should now succeed This portrayal of the school curriculum today and how it could be developed in line with the new aims will be of interest to those studying education with a particular focus on the areas of curriculum assessment school management philosophy of education and the history of education

Curriculum, Schooling and Society in Hong Kong Paul Morris, Bob Adamson, 2010-11-01 Hong Kong is a fascinating place for the study of curriculum Its schooling system is influenced by the

legacies of a Chinese tradition and British colonialism and was developed at a time when around the world that state was taking more responsibility for the education of young people and educational policies were increasingly influenced by the impact of globalization To this we can add the complexities of Hong Kong as a society one that has witnessed major political and economic changes over the past 150 years or so and particularly since the late 1970s The dynamics produce an intricate interplay of innovation and conservatism globalization and localization liberalism and authoritarianism devolution and centralization and many other tensions This book provides a comprehensive introduction to curriculum as a field of study in a way which highlights its inherent dilemmas and complexities by illustrating the diverse ways in which a curriculum can be developed and analyzed It also presents a specific analysis of the Hong Kong school curriculum and highlights the ways in which the curriculum both reflects and changes in response to broader socio political shifts Publisher's website *Debates in Geography Education* Mark Jones, David Lambert, 2017-09-07 *Debates in Geography Education* encourages early career teachers experienced teachers and teacher educators to engage with and reflect on key issues concepts and debates It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding The second edition is fully updated in light of the latest research policy and practice in the field as well as key changes to the curriculum and examination specifications Expert contributors provide a range of perspectives on international historical and policy contexts in order to deepen our understanding of significant debates in geography education Key debates include geography's identity as an academic discipline what constitutes knowledge in geography places and regional geography what it means to think geographically constructing the curriculum how we link assessment to making progress in geography the contribution of fieldwork and outdoor experiences technology and the use of Geographical Information school geography and employability understanding the gap between school and university geography evidence based practice and research in geography education The comprehensive rigorous coverage of these key issues together with carefully annotated selected further reading will help support and shape further research and writing *Debates in Geography Education* is a key resource that is essential reading for all teachers and researchers who wish to extend their grasp of the place of geography in education Mark Jones is Senior Lecturer in Education at the University of the West of England Bristol UK David Lambert is Professor of Geography Education at UCL Institute of Education London UK *Fundamentals of the Physical Environment* Peter Smithson, Ken Addison, Ken Atkinson, 2013-09-05 *Fundamentals of the Physical Environment* has established itself as a well respected core introductory book for students of physical geography and the environmental sciences Taking a systems approach it demonstrates how the various factors operating at Earth's surface can and do interact and how landscape can be used to decipher them The nature of the earth its atmosphere and its oceans the main processes of geomorphology and key elements of ecosystems are also all explained The final section on specific environments usefully sets in context the physical processes and human impacts This fourth edition has been extensively revised to incorporate current thinking and knowledge

and includes a new section on the history and study of physical geography an updated and strengthened chapter on climate change 9 and a strengthened section on the work of the wind a revised chapter 15 on cryosphere systems glaciers ice and permafrost a new chapter 23 on the principles of environmental reconstruction a new joint chapter 24 on polar and alpine environments a key new joint chapter 28 on current environmental change and future environments new material on the Earth System and cycling of carbon and nutrients themed boxes highlighting processes systems applications new developments and human impacts a support website at www.routledge.com/textbooks/9780415395168 with discussion and essay questions chapter summaries and extended case studies Clearly written well structured and with over 450 informative colour diagrams and 150 colour photographs this text provides students with the necessary grounding in fundamental processes whilst linking these to their impact on human society and their application to the science of the environment
