Longman Register Of New Words:

The Longman Register of New Words John Ayto, 1989 **Fifty Years Among the New Words** John Algeo, Adele S. Algeo, 1991 This book first published in 1992 is a unique repository of language use from 1941-91 Twentieth Century Borrowings from French to English Julia Landmann, 2013-01-16 French has long been the donor language par excellence in the history of English. French has contributed to the English vocabulary in the form of new words since before the Norman Conquest. The French influence on the English lexicon represents the focus of linguistic concern in a considerable number of investigations of the language and its development. Yet French borrowings which have recently been adopted into English have as yet figured little if at all in such studies. The present study sets out to shed light on the French impact on English in the recent past. The results presented in this book are based on a corpus of 1677 twentieth century French borrowings collected from the Oxford English Dictionary Online. On the basis of their meanings the words under consideration have been assigned to different subject fields in order to give a tour d'horizon of the manifold areas and spheres of life enriched by French in recent times. The first part of the present investigation concentrates on the phonological and orthographical reception of the various borrowings. The focus of this study is on the semantic development of the French borrowings in comparison to their sources in the donor language. Emphasis has been placed upon analysing whether a particular meaning a borrowing assumes after its first attested use is taken over from French or whether it represents an independent semantic change within English. The Arabic Contributions to the English Language Garland Hampton Cannon, Alan S. Kaye, 1994 The largest and most up to date collection of English words and multiword units borrowed from the Arabic directly or indirectly totalling 2338 items. All major dictionaries in English were surveyed including new word collections and college dictionaries. Each dictionary entry gives the first recorded date of the loan in English, the semantic field, variant forms, etymology, the English definitions, derivative forms and sometimes grammatical comment. The major sources of each entry are noted along with the approximate degree of assimilation in English. A substantial part of the book is devoted to nontechnical analytical essays which treat the forty-six semantic areas so as to embrace all disciplines and throw light on the individual subject. Other essays treat the phonological and linguistic aspects of the data so as to show how languages in contact interact and ultimately influence each other's culture. This is a wide-ranging innovative book that advances the study of comprehensive borrowing within languages over the centuries. *Specialised Translation* M. Rogers, 2015-05-26 This book shifts the common perception of specialised or LSP translation as necessarily banal and straightforward towards a more realistic understanding of it as a complex and multilayered phenomenon which belies its standard negative binary definition as non-literary. **Watching English Change** Laurie Bauer, 2014-06-03 Examines the ways language has changed in the twentieth century. It concentrates on standard English and takes a historical rather than sociolinguistic view of the changes which have occurred. *New Media Language* Jean Aitchison, Diana M.
