Longrun Economic Growth:

Understanding Long-Run Economic Growth Dora L. Costa, Naomi R. BOOK JACKET *Long-Run Economic Growth* Steven Durlauf, John F. Helliwell, Baldev Raj, 2012-12-06 One of the most enduring questions in economics involves how a nation could accelerate the pace of its economic development One of the most enduring answers to this question is to promote exports either because doing so directly influences development via encouraging production of goods for export or because export promotion permits accumulation of foreign exchange which permits importation of high quality goods and services which can in turn be used to expand the nation's production possibilities In either case growth is said to be export led the latter case is the so called two gap hypothesis McKinnon 1964 Findlay 1973 The early work on export led growth consisted of static cross country comparisons Michaely 1977 Balassa 1978 Tyler 1981 Kormendi and Meguire 1985 These studies generally concluded that there is strong evidence in favour of export led growth because export growth and income growth are highly correlated However Kravis pointed out in 1970 that the question is an essentially dynamic one as he put it are exports the handmaiden or the engine of growth To make this determination one needs to look at time series to see whether or not exports are driving income This approach has been taken in a number of papers Jung and Marshall 1985 Chow 1987 Serletis 1992 Kunst and Marin 1989 Marin 1992 Afentis and Serletis 1991 designed to assess whether or not individual countries exhibit statistically significant evidence of export led growth using Granger causality tests

Long-run Economics Norman Clark, Calestous Juma, 2013-11-07 A major problem of conventional economic theory as applied to long run economic change is its unduly narrow and static character which compromises its capacity to handle conceptually a social process inherently systemic complex and dynamic At the same time there is a growing realization in relevant government and industrial circles reinforced by the example of Japan that effective economic policy making needs a strategic and therefore a technological content Long Run Economics suggests a more realistic conceptual framework for the analysis of economic and technological change Borrowing from other disciplines such as sociology psychology and biology the authors develop a model that is evolutionary and systemic in character Special emphasis is given to the role of information flows in the innovative process while the overall argument is illustrated by two case studies photovoltaics and fuel ethanol Finally the book stresses the strategic importance of science and technology policy and the role of appropriate institutions in facilitating long run economic change
