The Naturally Frugal Baby Peggy Wilson, 2011-03-01. These are tough economic times and having a baby seems like an unaffordable luxury to many people. But it doesn't have to be. This book provides a crash course in superfrugal baby care starting before conception and continuing through the baby's first year. You can make birth house feed diaper clothes, entertain and transport a baby for a mere fraction of what the experts say it all will cost, save thousands of dollars and have fun at the same time. I wrote this book to be the reference that I wish I'd had before I started having children. It starts with basic financial planning for aspiring parents and straightforward how to instructions for frugal baby care and keeps right on going into black belt frugality topics and some of the more controversial issues of modern parenting. I've read the studies and done the math and in this book I tell you what I've learned. At the end there is a long list of helpful print and online references for further reading.

Winnicott's Babies and Winnicott's Patients Margaret Boyle Spelman, 2018-05-11. Winnicott's thinking continues to grow in importance in psychoanalysis today. This book can be described as a clinical primer by presenting her own personal responses to Winnicott and her initial understanding of his thinking. The author tries to help others develop their own Winnicott to assist with their clinical thinking. This book makes explicit the parallel in Winnicott's thinking between the situation of the baby and the nursing couple and the patient and the analytic couple. There are two helpful baby observation pieces which are aimed at first giving something of the experience of completing a baby observation and then of the reporting of it. In addition to these there are chapters that treat Winnicott's thinking and the comparison of the original baby with the one who appears in the course of an adult therapy. Winnicott's thinking is first situated historically. Then each of his three stages of dependence are explored in detail: absolute dependence, relative dependence and going towards independence. These are looked at from the viewpoint of the patient baby and the mother therapist in both developmental and clinical situations.
