Reflections on Slope Stability Engineering Edward N. Bromhead, 2023-09-19 Slope stability engineering is both an art and a science practised by many civil and geotechnical engineers involved in work on landslides earth dams breakwaters coastal defence earthworks slopes for roads canals railways pipelines housing developments and other related developments This book contains the detailed reflections of its author who has practised and researched in the field for over a half century It is written in an informal style that makes it an interesting and thought provoking practitioner guide to landslides and slope problems and their investigation analysis and remediation considering both natural and man made slopes and earthworks and without the need for the usual equations and illustrations *Reflections on Slope Stability Engineering* is targeted primarily at practitioners working in the investigations of slope instability and the design and construction of treatments of the problem especially those early in their careers but the accessible style also suits students who are developing an interest in the subject and even those engineers with only a casual interest in this branch of geotechnics Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions Francesco Silvestri, Nicola

Kokhan, 2007-09-14 On June 28 through July 1 2006 a NATO advanced research workshop was held in Kyiv Ukraine This meeting of scholars from both NATO and NATO partner countries brought together the leading researchers in the field of Fuzziness and Uncertainty in GIS for Environmental Security and Protection The papers based upon the presentations at this meeting are included in this book They were all quite good some focusing on the use of fuzzy sets in geography others

focusing on explicit environmental concerns in Ukraine What this book cannot show is the camaraderie and spirit of cooperation that permeated the atmosphere of this workshop These researchers many of whom had never met before are now colleagues and are continuing to collaborate on research to this day and probably beyond Scholars from various positions and countries have chosen to work together in the spirit of cooperation to make the ideas presented in this book come to fruition At press time we do not know if Ukraine will become a NATO member or not In any case the editors wish to thank the NATO Science Committee for their funding encouragement and work in making this workshop a reality We hope that the spirit of cooperation and intellectual curiosity that was so lively at the conference will encourage the reader in the perusal of this work
