Immigrants and the Industries of London, 1500-1700 Lien Bich Luu, 2017-03-02 Immigration is not only a modern day debate Major change in Europe in the sixteenth and seventeenth centuries led to a surge of political and religious refugees moving across the continent Estimates suggest that from 1550 to 1585 around 50 000 Dutch and Walloons from the southern Netherlands settled in England and in the late seventeenth century 50 000 Huguenots from France followed suit The majority gravitated towards London which already a magnet for merchants and artisans across the centuries began a process of major transformation New skills capital technical know how and social networks came with these migrants and helped to spark London s cosmopolitan flair and diversity But the early experience of many of these immigrants in London was one of hostility serving to slow down the adoption and expansion of new crafts and technologies Immigrants and the Industries of London 1500 1700 examines the origins and the changing face and shape of many trades crafts and skills in the capital in this transformative period It focuses on three crafts in particular silk weaving beer brewing and the silver trade crafts which had relied heavily on foreign skills in the 16th century and had become major industries in the capital by the 18th century Each craft was established by a different group of immigrants distinguished not only by their social backgrounds social organisation identity motives migration pattern and experience and links with their home country but also by the nature of their reception assimilation and economic contribution Change was a protracted process in the London of the day Immigrants endured inferior status discrimination and sometimes exclusion and this affected both their ability to integrate and their willingness to share trade secrets And resistance by the English population meant that the adoption of new skills often took a long time in some cases more than three centuries to complete The book places the adoption of new crafts and technologies in London within a broader European context and relates it to the phenomenal growth of the metropolis and technological developments within these specific trades It throws new perspectives on the movement of skills from Europe and the transmission of know how from the immigrant population to English artisans The book explores how through enterprise and persistence the immigrants contribution helped transform London from a peripheral and backward European city to become the workshop of the world by the nineteenth century By way of conclusion the book brings the current immigration debate full circle to examine the lessons we can draw from this early modern experience

Guide to the Materials in London Archives for the History of the United States Since 1783 Charles Oscar Paullin, Frederic Logan Paxson, 1914 *In The Shadow of St. Paul's Cathedral* Margaret Willes, 2022-04-26 The extraordinary story of St Paul s Churchyard the area of London that was a center of social and intellectual life for more than a millennium St Paul s Cathedral stands at the heart of London an enduring symbol of the city Less well known is the neighborhood at its base that hummed with life for over a thousand years becoming a theater for debate and protest knowledge and gossip For the first time Margaret Willes tells the full story of the area She explores the dramatic religious debates at Paul s Cross the bookshops where Shakespeare came in

search of inspiration and the theater where boy actors performed plays by leading dramatists After the Great Fire of 1666 the Churchyard became the center of the English literary world its bookshops nestling among establishments offering luxury goods This remarkable community came to an abrupt end with the Blitz First the soaring spire of Old St Paul s and then Wren s splendid Baroque dome had dominated the area but now the vibrant secular society that had lived in their shadow was no more

St Paul's Cathedral Precinct in Early Modern Literature and Culture Roze Hentschell,2020-06-16 Prior to the 1666 fire of London St Paul s Cathedral was an important central site for religious commercial and social life in London The literature of the period both fictional and historical reveals a great interest in the space and show it to be complex and contested with multiple functions and uses beyond its status as a church St Paul s Cathedral Precinct in Early Modern Literature and Culture Spatial Practices animates the cathedral space by focusing on the every day functions of the building deepening and sometimes complicating previous works on St Paul s St Paul s Cathedral Precinct in Early Modern Literature and Culture is a study of London s cathedral its immediate surroundings and its everyday users in early modern literary and historical documents and images with special emphasis on the late sixteenth and early seventeenth centuries It discusses representations of several of the seemingly discrete spaces of the precinct to reveal how these spaces overlap with and inform one another spatially and argues that specific locations should be seen as mutually constitutive and in a dynamic and ever evolving state The varied uses of the precinct including the embodied spatial practices of early modern Londoners and visitors are examined including the walkers in the nave sermon goers those who shopped for books the residents of the precinct the choristers and those who were devoted to church repairs and renovations

Textiles and the Medieval Economy Angela Ling Huang,Carsten Jahnke,2014-06-30 Archaeologists and textile historians bring together 16 papers to investigate the production trade and consumption of textiles in Scandinavia and across parts of northern and Mediterranean Europe throughout the medieval period Archaeological evidence is used to demonstrate the existence or otherwise of international trade and to examine the physical characteristics of textiles and their distribution in order to understand who was producing using and trading them and what they were being used for Historical evidence mainly textual is employed to link textile names to places numbers and prices and thus provide an appreciation of changing economics patterns of distribution and the organisation of trade Different types and qualities of cloths are discussed and the social implications of their production and import export considered against a developing background of urbanism and increasing commercial wealth
