scientists of tomorrow **Teaching Science Through Trade Books** Christine Anne Royce, Karen Rohrich Ansberry, Emily Rachel Morgan, 2012 If you like the popular Teaching Science Through Trade Books columns in NSTA's journal Science and Children or if you've become enamored of the award winning Picture Perfect Science Lessons series you'll love this new collection. It's based on the same time-saving concept. By using children's books to pique students' interest, you can combine science teaching with reading instruction in an engaging and effective way. Science Education For Citizenship Ratcliffe, Mary, Grace, Marcus, 2003-07-01 This is overwhelmingly a valuable book, particularly in the context of science education in the UK. It is a book that deserves to be read more widely by science teachers, particularly those who seek not simply to extend their repertoire of teaching techniques but who wish to place these techniques upon a sound academic footing. Educational Review I have greatly enjoyed reading through Science Education for Citizenship. It is extremely informative and contains much of value. We will definitely be putting it on our MA in Science Education reading list. Dr Michael Reiss, Institute of Education, University of London. This innovative book explores the effective teaching and learning of issues relating to the impact of science in society. Research case studies are used to examine the advantages and problems as science teachers try new learning approaches, including ethical analysis, use of media reports, peer group decision making, discussions, and community projects. This book offers practical guidance in devising learning goals and suitable learning and assessment strategies, helps teachers to provide students with the skills and understanding needed to address these multi-faceted issues, explores the nature and place of socio-scientific issues in the curriculum, and the support necessary for effective teaching. Science Education for Citizenship supports science teachers, citizenship teachers, and other educators as they help students to develop the skills and understanding to deal with complex everyday issues. *Teaching and Learning Secondary Science* Jerry Wellington, Professor Jerry Wellington, Gren Ireson, 2002-01-31 A comprehensive and critical guide for new and experienced teachers on the teaching and learning of science. It combines an overview of current research with an account of curriculum changes to provide a valuable and practical guide to the business of classroom teaching.
