Mathematical Thinking at Grade 3 Susan Jo Russell, 2006

Investigations into Assessment in Mathematics Education Mogens Niss, 1992-12-31 This book is one of the first to attempt

a systematic in depth analysis of assessment in mathematics education in most of its important aspects it deals with assessment in mathematics education from historical psychological sociological epistemological ideological and political perspectives The book is based on work presented at an invited international ICMI seminar and includes chapters by a team of outstanding and prominent scholars in the field of mathematics education Based on the observation of an increasing mismatch between the goals and accomplishments of mathematics education and prevalent assessment modes the book assesses assessment in mathematics education and its effects In so doing it pays particular attention to the need for and possibilities of assessing a much wider range of abilities than before including understanding problem solving and posing modelling and creativity The book will be of particular interest to mathematics educators who are concerned with the role of assessment in mathematics education especially as regards innovation and to everybody working within the field of mathematics education and related areas in R D curriculum planning assessment institutions and agencies teacher trainers etc

Cases of Mathematics Professional Development in East Asian Countries Swee Fong Ng, 2015-05-05 This book shows how video technology can be used to inform teachers personal practice and provides new data and real world case studies not covered by any previous book on the subject Initial chapters explore how practicing teachers can view their own recorded lessons and take steps to improve their methods while subsequent chapters examine how pre service and in service teachers can use recorded lessons to improve how they teach selected concepts or to better convey specific learning processes such as mathematical modeling and problem solving
