Choice and Control in American Education John F. Witte,William H. Clune,1990 TV Lobotomy Michel

Desmurget,2023-07-04 TV unleashes the imagination and feeds intelligence A child deprived of TV risks social isolation TV dumbs you down TV makes you obese It seems that everything and its opposite has already been said about TV But what is it really How can we distinguish between the radical No TV of some and the supposedly entertaining virtues touted by others Michel Desmurget a doctor in neuroscience has sifted through and synthesized thousands of research articles published over the last fifty years in the most rigorous international journals The conclusion is unequivocal we must stop watching television for good whatever the program All content even that meant to teach can never come close to any other learning method The data is clear television viewing is detrimental to school performance For a child in elementary school for example every hour spent daily watching television increases the likelihood that he or she will one day leave the school system without any qualifications For specialists there is no doubt that television has a negative influence not only on intellectual development but also on behavior Thus certain eating disorders anorexia bulimia are related to a frantic consumption of television programs In short watching television has an impact on our life expectancy However the harmful impact of this risk is largely underestimated because of the large sector of the public exposed to television more than 85% of Western households have at least one television set and because of a debate on the subject that has become inaudible and confused Moreover the results of the research initiated by the big media groups on the subject remain proprietary i e closed to the general public Believing that we is facing a real public health problem Michel Desmurget wants to act as a responsible scientist with a clear concise and rigorously referenced book the message cannot go unnoticed Michel Desmurget is a doctor of neuropsychology He attended several major American universities MIT Emory UCSF and is now a research director at INSERM in cognitive neuroscience He is particularly interested in the problems of brain organization and plasticity He is the author of the book TV Lobotomy Max Milo 2022 which is based in part on his personal history Exasperated by having to constantly justify the choice not to have television at home and to prevent his children from having access to it and not to be seen as a sociopath in the eyes of those around him he has done a massive job to argue his point **Science Resources Studies Highlights**

Mathematics Today 1987 Level 4: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Mathematics Today 1987 Level 4 : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
