Mathematics Into The Twenty First Century:

Mathematics Into the Twenty-first Century American Mathematical Society, 1992 In the summer of 1988 in Providence the AMS celebrated its centennial with a wide range of mathematical activities Among those was a symposium Mathematics into the Twenty first Century which brought together a number of the top research mathematicians who will likely have a significant impact on the mathematics of this century This book contains the lectures presented by 16 of the 18 individuals who spoke during the symposium Written by some of the major international figures in mathematical research this group of articles covers a panorama of the vital areas of mathematics at the turn of the 21st century and gives the general

mathematical reader a broad perspective on some of the major trends in research **Girls' Education in the Twenty-first Century** Mercy Tembon, Lucia Fort, 2008-01-01 Persuasive evidence demonstrates that gender equality in education is central to economic development Despite more than two decades of accumulated knowledge and evidence of what works in improving gender equality progress on the ground remains slow and uneven across countries What is missing Given that education is a critical path to accelerate progress toward gender equality and the empowerment of women what is holding us back These questions were discussed at the global symposium Education A Critical Path to Gender Equality and Women s Empowerment which was sponsored by the World Bank in October 2007 Girls Education in the 21st Century is based on background papers developed for the symposium The book s chapters reflect the current state of knowledge on education from a gender perspective and highlight the importance of and challenges to female education as well as the interdependence of education and development objectives The last chapter presents five strategic directions for advancing gender equality in education and their implications for World Bank operations Girls Education in the 21st Century will be of particular interest to researchers educators school administrators and policy makers at the global national regional and municipal levels *American Mathematical Society Centennial Publications*, 1988 [Representations of Science in](#)

Biopolitical Futures in Twenty-First-Century Speculative Fiction Sherryl Vint, 2021-10-07 Drawing on a rich array of twenty first century speculative fiction this book demonstrates how the commodification of life through biotechnology has far reaching implications for how we think of personhood agency and value Sherryl Vint argues that neoliberalism is reinventing life under biocapital She offers new biopolitical figurations that can help theoretically grasp and politically respond to a distinctive twenty first century biopolitics This book theorizes how biotechnology intervenes in the very processes of biological function reshaping life itself to serve economic ends Linking fictional texts with material examples *Biopolitical Futures in Twenty First Century Speculative Fiction* shows how these practices are linked to new modes of exploitative economic relations that cannot be redressed by human rights It concludes with a posthumanist reframing of the value of life that grounds itself elsewhere than in capitalist logics a vision that in a Covid age might become fundamental to a new politics of ecological relations *Moral Responsibility in Twenty-First-Century Warfare* Steven C. Roach, Amy E. Eckert, 2020-09-01

2021 CHOICE Outstanding Academic Title *Moral Responsibility in Twenty First Century Warfare* explores the complex relationship between just war theory and the ethics of autonomous weapons systems AWS One of the challenges facing ethicists of war particularly just war theorists is that AWS is an applicative concept that seems in many ways to lie beyond the humanist scope of the just war theory tradition The book examines the various ethical gaps between just war theory and the legal and moral status of AWS addresses the limits of both traditional and revisionist just war theory and proposes ways of bridging some of these gaps It adopts a dualistic notion of moral responsibility or differing related notions of moral responsibility and legitimate authority to study the conflicts and contradictions of legitimizing the autonomous weapons that are designed to secure peace and neutralize the effects of violence Focusing on the changing conditions and dynamics of

accountability responsibility autonomy and rights in twenty first century warfare the volume sheds light on the effects of violence and the future ethics of modern warfare Liberal Education in Twenty-first Century Engineering David F.
