Political Anxiety in Golden Age Children's Classics and Their Contemporary Adaptations Jasmin Sültemeyer, 2021-07-05 As striking counter intuitive and distasteful as the combination of children and anxiety may seem some of the most popular children s classics abound in depictions of traumatic relationships bloody wars and helpless heroes This book draws on Freudian and Lacanian anxiety models to investigate the psychological and political significance of this curious juxtaposition as it stands out in Golden Age novels from both sides of the Atlantic and their present day adaptations The stories discussed in detail so the argument goes identify specific anxieties and forms of anxiety management as integral elements of hegemonial middle class identity Apart from its audacious link between psychoanalysis and Marxist feminist as well as postcolonial ideology criticism this study provides a nuanced analysis of the ways in which allegedly trivial texts negotiate questions of individual and trans national identities In doing so it offers a fresh look at beloved tales like Alice s Adventures in Wonderland The Wizard of Oz and Peter Pan contributes to the dynamic field of adaptation studies and highlights the necessity to approach children s entertainment more seriously and more sensitively than it is generally the case

Ethnicity and Cultural Authority Daniel G. Williams, 2005-12-08 Longlisted for the Wales Book of the Year 2007 Writing in 1903 W E B Du Bois suggested that the goal for the African American was to be a co worker in the kingdom of culture He was evoking culture as a solution to the divisions within society thereby adopting in a very different context an idea that had been influentially expressed by Matthew Arnold in the 1860s Du Bois questioned the assumed universality of this concept by asking who ultimately is allowed into the kingdom of culture How does one come to speak from a position of cultural authority This book adopts a transatlantic approach to explore these questions It centres on four Victorian men of letters Matthew Arnold William Dean Howells W B Yeats and W E B Du Bois who drew on notions of ethnicity as a basis from which to assert their cultural authority In comparative close readings of these figures Daniel Williams addresses several key areas of contemporary literary and cultural debate The book questions the notion of the West as it appears and re appears in the formulations of postcolonial theory challenges the widespread tendency to divide

nationalism into civic and ethnic forms and forces its readers to reconsider what they mean when they talk about culture identity and national literature Key Features Offers a substantial innovative intervention in transatlantic debates over race and ethnicity Uses 4 intriguing authors to explore issues of national identity racial purity and the use of literature as a marker of cultural capital A unique focus on Celtic identity in a transatlantic context Sets up a dialogue between writers who believe in national identity and those who believe in cultural distinctiveness

Social Control and the Education of Adults in the Nineteenth and Early Twentieth Centuries J. Jeffrey Robinson, 2013 An almost universal concern of the Victorian governing classes was with the question of social control how to deflect a largely uneducated working class from their inevitable challenge to the centres of power accepted value systems and existing authority structures The fear in which the masses were held by the middle and upper classes came to dominate access to education or more accurately to what they defined as useful knowledge since this was designed to instil the values of a just and ordered society Conversely for the working class it would give them power power over their own lives and in so doing provide access to that social hierarchy currently valued by the governing minority This book addresses the role of the providers of education alongside the responses of those for whom it was intended It discusses the provision of educational initiatives and the frequent attenuation of their founding objectives It assesses the utility of the strategies of power and control adopted by the providers in order to maintain an upper class ideology Though evidence is discussed in a national context it is supported by additional data from a rural county both for the purpose of comparative analysis and in order to add character and hear the true voice of the men and women involved

Social Radicalism and Liberal Education Lindsay Paterson, 2015-10-21 Liberal education used to command wide political support Radicals disagreed with conservatives on whether the best culture could be appreciated by everyone and they disagreed too on whether the barriers to understanding it were mainly social and economic but there was no dispute that any worthwhile education ought to hand on the best that has been thought and said That consensus has vanished since the 1960s The book examines why social radicals supported liberal education why they have moved away from it and what the implications are for the future of an intellectually stimulating and culturally literate education

The Sixth: An Essay in Education and Democracy William Reid, Jane Filby, 2018-10-03 Developments in educational systems are inextricably linked with the social and political evolution of nations Nowhere is this more clearly to be seen than in the history of the English sixth form Originally published in 1982 this book whose authors had been

associated with a number of research projects into 16 19 education traces the tradition of the sixth form from its origins in the public schools of the nineteenth century through to controversies at the time over sixth form and tertiary colleges and the extension of 16 19 education to embrace youth opportunities programmes and other semi vocational courses It shows that the sixth has not only been a significant element in its own right in the adjustment of English society to the challenge of democratic ideals but has also played a key role in the evolution of secondary education from the endowed school of the nineteenth century through the municipal grammar schools set up after the 1902 Education Act to the comprehensive secondary schools of today In fact the fate and future of comprehensive schooling becomes fully understandable only through a study of the sixth form tradition which has shaped the activities of educationists and policy makers over the last hundred years The authors conclude that educational policy making is both facilitated and constrained by the existence of enduring traditions stemming from the past in fact the work of policy making lies precisely in the constructive reinterpretation of that inheritance This book describes and clarifies the nature of the tradition of sixth form education which has been handed down to us and its relation to democratic values and institutions

Education And The Struggle For Democracy

Carr, Wilfred, Hartnett, Anthony, 1996-03-01 During the past decade there has been a series of radical changes to the educational system of England and Wales This book argues that any serious study of these changes has to engage with complex questions about the role of education in a modern liberal democracy Were these educational changes informed by the needs and aspirations of a democratic society To what extent will they promote democratic values and ideals These questions can only be adequately addressed by making explicit the political ideas and the underlying philosophical principles that have together shaped the English educational system To this end the book provides a selective history of English education which exposes the connections between decisive periods of educational change and the intellectual and political climate in which it occurred It also connects the educational policies of the 1980s and 90s to the political ideas of the New Right in order to show how they are part of a broader political strategy aimed at reversing the democratic advances achieved

through the intellectual and political struggles of the nineteenth and twentieth centuries The book proposes that a democratic educational vision can only effectively be advanced by renewing the struggle for democracy the historical struggle to create forms of education which will empower all citizens to participate in an open pluralistic and democratic society

Contesting Cultural Rhetorics Margaret J. Marshall, 2025-10-01 Contesting Cultural Rhetorics is a groundbreaking and original study that demonstrates how education is viewed as a contested term and a set of contested practices in American culture because it is inevitably linked to highly contested value laden terms An examination of the public discourse of education not only reveals the ideologies and conceptions embedded in educative acts and institutions but also provides a means of examining how education itself functions in American culture as a site of contest between ideologies values and the constitution of individual and nation Margaret J Marshall s analysis employs a range of contemporary theorists from Bakhtin to Foucault and draws on a number of disciplinary perspectives including law history and ethnography where scholars have been examining discursive practices and where rhetoric is understood to be a means of examining cultural conceptions and embedded ideologies Through these lenses she examines four influential and popular texts of the 1890s that serve to illuminate current public debates on education Joseph Mayer Rice s articles in Forum a well respected magazine Matthew Arnold s introduction to a government report W E B Du Bois s A Negro Schoolmaster in the New South and Jane Addams s A Function of the Social Settlement Neither a history of education nor a typical literary analysis of the texts in question this book considers the rhetorical stance of authors the constitution of audience and subject and the use of references and narratives as devices of authority Taken together these texts reveal the complicated public discussion of education in the 1890s a period of transformation in culture schooling and the organization of knowledge Moreover they reveal the rhetorical structure of many of the questions Americans ask about education today who should be educated by whom for what purposes using what methods or materials What of the past should we pass on to the future and how Contesting Cultural Rhetorics will be useful to readers interested in the history of education and nineteenth century popular culture as well as those involved in current debates on education and public policy
