Maxwells Birthday:

Maxwell's Key in the Mirror Dee Andras, 2025-01-03 Maxwell's Key in the Mirror is a magical tale about a young boy who turns ten years old. While he is visiting his great grandparents he takes a tumble reaching for a key that fell off a mirror. The fall renders him unconscious and when he wakes up he has been transported to a new world where he is on his own. A girl named Penelope living in an underground house in the desert appears and believes Maxwell can help her save her world from the mandatory separation of people caused by the fruit of the walking trees. In return she would help him find his way home. Penelope tasks Maxwell with following a map to find her friend Doren who can help Maxwell and his newfound friends fight the walking trees together but their plan puts Maxwell in jeopardy. After burning down the trees Maxwell thinks all is well and he will now be headed home. A case of mistaken identity inadvertently lands Maxwell in a situation where he'll have to continue his quest to get back to his own world.

Maxwell's History of the World in 366 Lessons M. J. Trow, 2020-08-14 Peter Maxwell is the History teacher you wish you'd had. If you meet anyone and you will who says I hate History. It's boring, they weren't taught by Mad Max. Many of you will know him as the crime solving sleuth along with his police person wife Jacquie in the Maxwell series by M. J. Trow along with his non police person wife Carol aka Maryanne Coleman uncredited but what he is paid to do is teach History. And to that end has brought and continues to bring culture to thousands. In his blog Dinosaur Maxwell doesn't really know what that is written in 2012 the year in which the world was supposed to end but mysteriously didn't. You will find all sorts of fascinating factoids about the only important subject on the school curriculum. So if you weren't lucky enough to be taught by Max or you've forgotten all the History you ever knew here is your chance to play catch up. The blog has been edited by Maxwell's friend the crime writer M. J. Trow who writes almost as though he knows what the Great Man was thinking. As Maxwell himself has been known to say Spooky.

Maxwell's Demon Harvey S. Leff, Andrew F. Rex, 2014-07-14 About 120 years ago James Clerk Maxwell introduced his now legendary hypothetical demon as a challenge to the integrity of the second law of thermodynamics. Fascination with the demon persisted throughout the development of statistical and quantum physics, information theory and computer science and linkages have been established between Maxwell's demon and each of these disciplines. The demon's seductive quality makes it appealing to physical scientists, engineers, computer scientists, biologists, psychologists and historians and philosophers of science. Until now its important source material has been scattered throughout diverse journals. This book brings under one cover twenty-five reprints including seminal works by Maxwell and William Thomson, historical reviews by Martin Klein, Edward Daub and Peter Heimann, information theoretic contributions by Leo Szilard, Leon Brillouin, Dennis Gabor and Jerome Rothstein and innovations by Rolf Landauer and Charles Bennett illustrating linkages with the limits of computation. An introductory chapter summarizes the demon's life from Maxwell's illustration of the second law's statistical nature to the most recent exorcism of the demon based on a need periodically to erase its memory. An annotated chronological bibliography is included.
