Positive Attitude Key To Success:

Positive Attitude - Key to Success Dan Miller, 2015-09-10 Positive mental attitude is a concept that has been developed in many areas of life as a key to success In 1937 Napoleon Hill introduced the importance of positive thinking in his book *Think and Grow Rich* Later on other scholars such as W Clement Stone found positive mental attitude as a very critical component to personal success and productivity The right mental attitude is associated with positive characteristics such as hope courage faith optimism generosity initiative tolerance kindness and good common sense Positive attitude is more of a philosophy that builds on the fact that having an optimistic disposition in any circumstance of life can help you in enhancing achievement and positive changes It is a state of mind that tirelessly seeks for ways of victory regardless of the surrounding circumstances Positivity by its mere definition opposes negativity hopelessness and defeatism To develop mental strength you need deliberate measures and commitment A resilient mind is one that never loses focus even when subjected to the most stressful conditions Mental toughness will help you maneuver through stress and emerge stronger than before A mental attitude is the bridge that connects success and failure On one end of the bridge is failure which is characterized by negativity while on the other end it is success which is denoted by a positive attitude At any given time individuals are between the two points emotionally They are at liberty to swing towards any end but they must also be ready to bear the consequences It is true that you can overcome negativity but you must be determined Having a clear understanding of the end result can motivate you to changing from negativity into positivity With a positive attitude it is possible to turn situations of failure into success

Positive Attitude Dan Miller, 2014-12-17 Positive mental attitude is a concept that has been developed in many areas of life as a key to success In 1937 Napoleon Hill introduced the importance of positive thinking in the book *Think and Grow Rich* Later on other scholars such as W Clement Stone found positive mental attitude as a very critical component to personal success and productivity The right mental attitude is associated with positive characteristics such as hope courage faith optimism generosity initiative tolerance kindness tact and good common sense Positive attitude is more of a philosophy that builds on the fact that having an optimistic disposition in any circumstance of life can help you in enhancing achievement and positive changes It is a state of mind that tirelessly seeks for ways of victory regardless of the surrounding circumstances Positivity by its mere definition opposes negativity hopelessness and defeatism To develop mental strength you need deliberate measures and commitment A resilient mind is one that never loses focus even when subjected to the most stressful conditions Mental toughness will help you maneuver through stress and emerge stronger than before A mental attitude is the bridge that connects success and failure On one end of the bridge is failure which is characterized by negativity while on the other end it is success which is denoted by a positive attitude At any one given time individuals are between the two points emotionally They are at liberty to swing towards any end but they must also be ready to bear the consequences It is true that you can overcome negativity but you must be determined Having a clear understanding of the

end result can motivate you to changing you from negativity into positivity It is possible to turn situations of failure into success With a positive attitude your setback can be a setup for a comeback Difficult times come to each one of us without an introduction These situations can sink us deeper leaving us more depressed and devastated internally Being positive in life will help you to handle these circumstances and find a way around them This is because a positive attitude gives you a unique dimension that takes into account the storm that you are currently passing through and the lull that is imminent immediately after the storm is over With these two perspectives you can develop a coping strategy that has both endurance and hope knowing that good times are still ahead

Positive Thinking Anthony Ekanem, 2016-08-12 You have probably had someone tell you to think positive when you were in a trying situation That is because the power of positive thinking is something that is a widely held belief Most people easily accept that when you give off positive energy you can infect others with that positive energy and that they will return that energy to you It is basically the idea that what you put out there will come back to you Positive influences are all around us They exist because people love to feel good People prefer the positive to the negative You can likely relate to this You would probably rather be around someone who is upbeat and full of energy than someone who is depressed and moping around People see that thinking positive and having a positive attitude can play a large role in their life Positive thinking can be very powerful and by putting it to work in your life you can reap the positive benefits
