## Reclaiming Democracy:

**Reclaiming Democracy** Meta Mendel-Reyes, 2013-10-11 Meta Mendel Reyes provides a critical look at our fascination with the sixties discusses the ways in which democratic participation was at the heart of sixties politics and explores the interrelationship between the history and memory of the sixties and contemporary democratic politics Mendel Reyes stresses that if told properly the story of the sixties could help open our eyes to the possibility that ordinary people can take democratic action and do have the ability to make a difference in nineties politics In a time of cynicism about the American government's ability to solve the crises of inequality poverty and racism Mendel Reyes puts the decline of political participation in historical context and provides hope for the coming decades *College Teaching and Learning for Change* Margaret A. Miller, 2017-03-27 Students and faculty come together in this powerful collection to discuss experiences and teaching practices that can change students' lives Organized into four parts these first person accounts explore the many challenges facing college students offering advice on how to best serve low income first generation underrepresented student populations how to foster political engagement and how to help students take charge of their lives and education The stories in *College Teaching and Learning for Change* provide higher education faculty and student affairs practitioners with an increased understanding of the wide variety of student experiences and together they constitute a platform for encouraging student success *We Are Not Able to Live in the Sky* Mara Kardas-Nelson, 2024-06-11 Shortlisted for the J Anthony Lukas Prize A deeply reported work of journalism that explores the promises and perils of microfinance told through the eyes of international lenders and women borrowers in West Africa In the mid 1970s Muhammad Yunus an American trained Bangladeshi economist met a poor female stool maker who needed money to expand her business In an act widely known as the beginning of microfinance Yunus lent 27 to forty two women hoping small credit would help the women pull themselves out of poverty Soon Yunus's Grameen Bank was born and the idea of giving very small high interest loans to poor people took off In 2006 Yunus and the Grameen Bank won the Nobel Peace Prize for efforts to create economic and social development from below But there's a problem with this story There are mounting concerns that these small loans are as likely to bury poor people in debt as they are to pull them from poverty with borrowers from India to Kenya facing consequences such as jail time and forced land sales Reportedly hundreds have even committed suicide What happened Did microfinance take a wrong turn or was it flawed from the beginning Mara Kardas Nelson's *We Are Not Able to Live in the Sky* is about unintended consequences blind optimism and the decades long ramifications of seemingly small policy choices The book is rooted in the stories of women borrowers in Sierra Leone West Africa Their narratives woven through a deep history of modern international development are set against the rise of Yunus's vision that tiny loans would put poverty in museums Kardas Nelson asks What is missed with a single financially focused solution to global inequity that ignores the real drivers of poverty Who stands to benefit and more important who gets left behind *Political Entrepreneurship* Josef

Lentsch,2018-11-20 This book demonstrates how political entrepreneurs entrepreneurially minded citizens who launch innovative political start ups can drive political change Building on unique insights rich examples and personal stories of centrist political entrepreneurs distilled from 40 in depth interviews the author guides readers through key stages of political entrepreneurship and shows how to master them By equally highlighting successes and failures the book reveals how political entrepreneurs actually go about producing transformative political change In light of the populist challenge and the decline of traditional political parties the book also offers an entertaining backstage view and first hand insights into the successes of En Marche in France Ciudadanos in Spain NEOS in Austria and other centrist political startups It provides practical advice on how to learn from and replicate their successes Political practitioners and other politically interested readers will find a useful theory of Political Entrepreneurship what it is how it works and what its role is in 21st century democracies Most of all they will find essential reproducible tools and methods You have read a lot about startups in business but if you want to know how Silicon Valley style startups look in politics read this Its author is not only writing about political entrepreneurs he is one of them Ivan Krastev Chairman of the Centre for Liberal Strategies in Sofia and permanent Fellow at the Institute of Human Sciences in Vienna No one understands better what it takes to take a political start up from ideation to the parliament than Josef Lentsch In Political Entrepreneurship he combines first hand experience with a thoughtful review of what we know about entrepreneurship in the interest of society Johanna Mair Professor of Organization Strategy and Leadership at the Hertie School of Governance and Co Director Global Innovation for Impact Lab at Stanford University Josef Lentsch has produced a fascinating commanding guide to the new insurgent players shaking up traditional party systems and reinvigorating liberal politics Political Entrepreneurship is essential reading for anyone who wants to understand today s fragmented and disrupted European politics and the European politics of the future Jeremy Cliffe Charlemagne columnist The Economist The rarest of events has occurred a new political species has appeared in the European eco system the centrist political start up From Macron s En Marche in France to Spain s Ciudadanos a new type of political actor has emerged Few are better positioned to tell this Europe wide story than Josef Lentsch who has had a front seat view on this important political transformation that is shaking Europe A dramatic and important account Daniel Ziblatt Eaton Professor of Government Harvard University and co author of How Democracies Die Reclaiming Democracy Albena Azmanova,Mihaela Mihai,2015-03-02 Democracy is in shambles economically and politically The recent economic meltdown in Europe and the U S has substituted democratic deliberation with technocratic decisions In Athens Madrid Lisbon New York Pittsburgh or Istanbul protesters have denounced the incapacity and unwillingness of elected officials to heed to their voices While the diagnosis of our political economic illness has been established remedies are hard to come What can we do to restore our broken democracy Which modes of political participation are likely to have an impact And what are the loci of political innovation in the wake of the crisis It is with these questions that Reclaiming Democracy

engages We argue that the managerial approach to solving the crisis violates a right to politics that is a right that our collective life be guided by meaningful politics by discussion of and decision among genuinely alternative principles and policies The contributors to this volume are united in their commitment to explore how and where this right can be affirmed in a way that resuscitates democracy in the wake of the crisis Mixing theoretical reflection and empirical analysis the book offers fresh insights into democracy's current conundrum and makes concrete proposals about how the right to politics can be protected

**The Will to Empower** Barbara Cruikshank, 2019-06-30 How do liberal democracies produce citizens who are capable of governing themselves In considering this question Barbara Cruikshank rethinks central topics in political theory including the relationship between welfare and citizenship democracy and despotism and subjectivity and subjection Drawing on theories of power and the creation of subjects Cruikshank argues that individuals in a democracy are made into self governing citizens through the small scale and everyday practices of voluntary associations reform movements and social service programs She argues that our empowerment is a measure of our subjection rather than of our autonomy from power Through a close examination of several contemporary American technologies of citizenship from welfare rights struggles to

philanthropic self help schemes to the organized promotion of self esteem awareness she demonstrates how social mobilization reshapes the political in ways largely unrecognized in democratic theory Although the impact of a given reform movement may be minor the techniques it develops for creating citizens far extend the reach of governmental authority Combining a detailed knowledge of social policy and practice with insights from poststructural and feminist theory The Will to Empower shows how democratic citizens and the political are continually recreated Political Theory and the Enlarged Mentality Stephen Acreman,2017-10-20 In this book Stephen Acreman follows the development and reception of a hitherto under analyzed concept central to modern and postmodern political theory the Kantian *ein erweiterte Denkungsart* or enlarged mentality While the enlarged mentality plays a major role in a number of key texts underpinning contemporary democratic theory including works by Arendt Gadamer Habermas and Lyotard this is the first in depth study of the concept encompassing and bringing together its full range of expressions A number of attempts to place the enlarged mentality at the service of particular ideals the politics of empathy of consensus of agonistic contest or of moral righteousness are challenged and redirected In its exploration of the enlarged mentality the book asks what it means to assume a properly political stance and in giving as the answer facing reality together it uncovers a political theory attentive to the facts and events that concern us and uniquely well suited to the ecological politics of our time Constituting Economic and Social Rights Katharine G. Young,2012-08-23 Food water health housing and education are as fundamental to human freedom and dignity as privacy religion or speech Yet only recently have legal systems begun to secure these fundamental individual interests as rights This book looks at the dynamic processes that render economic and social rights in legal form It argues that processes of interpretation enforcement and contestation each reveal how economic and social interests can be protected as human and constitutional rights and how their protection changes public law Drawing on constitutional examples from South Africa Colombia Ghana India the United Kingdom the United States and elsewhere the book examines innovations in the design and role of institutions such as courts legislatures executives and agencies in the organization of social movements and in the links established with market actors This comparative study shows how legal systems protect economic and social rights by shifting the focus from minimum bundles of commodities or entitlements to processes of value based deliberative problem solving Theories of constitutionalism and governance inform the potential of this approach to reconcile economic and social rights with both democratic and market principles while addressing the material inequality poverty and social conflict caused in part by law itself **Transition Strategies for Sustainable Community Systems** Amar KJR Nayak,2019-01-23 This book presents five critical dimensions on relationships institutions production organisation and governance from design and systems perspectives for the systematic transition of unstable and vulnerable communities across the world to sustainable community systems The first section discusses features of relationships and processes to deepen cooperation and trust within a community The second section examines institutions within and outside a district to foster synergy across institutions within

**Ukraine's Maidan, Russia's War** Mychailo Wynnnyckyj, 2019-04-30 In early 2014 sparked by an assault by their government on peaceful students Ukrainians rose up against a deeply corrupt Moscow backed regime Initially demonstrating under the banner of EU integration the Maidan protesters proclaimed their right to a dignified existence they learned to organize to act collectively to become a civil society Most prominently they established a new Ukrainian identity territorial inclusive and present focused with powerful mobilizing symbols Driven by an urban bourgeoisie that rejected the hierarchies of industrial society in favor of a post modern heterarchy a previously passive post Soviet country experienced a profound social revolution that generated new senses Dignity and fairness became rallying cries for millions Europe as the symbolic target of political aspiration gradually faded but the impact including on Europe of Ukraine's revolution remained When Russia invaded illegally annexing Crimea and then feeding continuous military conflict in the Donbas Ukrainians responded with a massive volunteer effort and touching patriotism In the process they transformed their country the region and indeed the world This book provides a chronicle of Ukraine's Maidan and Russia's ongoing war and puts forth an analysis of the Revolution of Dignity from the perspective of a participant observer

**Performing Citizenship** Inbal Ofer, Tamar Groves, 2015-12-07 In this book Tamar Groves and Inbal Ofer explore the effects of social

movements activism on the changing practices and conceptions of citizenship Presenting empirically rich case studies from Latin America Asia and Europe leading experts analyze the ways in which the shifting balance of power between nation state economy and civil society over the past half century affected social movements in their choice of addressees and repertoires of action Divided into two parts the first part focuses on citizenship as a form of political and cultural participation The three case studies that make up this section look into the ways in which social movements activism prompted a critical re evaluation of two central questions Who can be considered a citizen And what forms of political and cultural participation effectively enable citizens to exercise their rights The second section focuses on citizenship as a form of community building The three case studies that are included in this section address the ways in which activism fosters new forms of advocacy and communication leading to the emergence of new communities and assigning qualities of fraternity to the status of citizenship Throughout most of the 20th century social movements literature focused on the challenges these entities posed to the state since it was the state that had the capacity and willingness to grant social and economic concessions This situation started to shift in the late 1960s By the 1980s the existing configuration between the state civil society and the economy was increasingly challenged by market penetration Accordingly we witness a proliferation of social movements that no longer target state institutions or do so only partially Their repertoires of action interact continuously with everyday practices re shaping demands within specific organizational legislative and political contexts As a result such activism expands the understanding of the concept of citizenship so as to include demands relating to livelihood division of resources the production and dissemination of knowledge and forms of civic participation and solidarity Written for scholars who study social movements citizenship and the relationship between the state and civil society over the past half century this book provides a fresh insight on the nature of citizenship increasingly framing the condition of being a citizen in terms of performance and on going practices rather than simply in relation to the attainment of a formal status *Pipeline Populism*

Kai Bosworth, 2022-05-24 How contemporary environmental struggles and resistance to pipeline development became populist struggles Stunning Indigenous resistance to the Keystone XL and the Dakota Access pipelines has made global headlines in recent years Less remarked on are the crucial populist movements that have also played a vital role in pipeline resistance Kai Bosworth explores the influence of populism on environmentalist politics which sought to bring together Indigenous water protectors and environmental activists along with farmers and ranchers in opposition to pipeline construction Here Bosworth argues that populism is shaped by the affective infrastructures emerging from shifts in regional economies democratic public review processes and scientific controversies With this lens he investigates how these movements wax and wane moving toward or away from other forms of environmental and political ideologies in the Upper Midwest This lens also lets Bosworth place populist social movements in the critical geographical contexts of racial inequality nationalist sentiments ongoing settler colonialism and global empire crucial topics when grappling with the tensions

embedded in our era's immense environmental struggles Pipeline Populism reveals the complex role populism has played in shifting interpretations of environmental movements democratic ideals scientific expertise and international geopolitics Its rich data about these grassroots resistance struggles include intimate portraits of the emotional spaces where opposition is first formed Probing the very limits of populism Pipeline Populism presents essential work for an era defined by a wave of people powered movements around the world

Citizens vs. Markets Lorenzo Fioramonti, 2017-07-05 After an apparent temporary relief the financial crisis is back full steam The double dip has turned into a full blown meltdown of financial markets public budgets and by and large democratic accountability This global crisis is a fundamental wake up call a signal that our conventional political economy and perhaps the very foundations of our societies need a serious rethink Currently the spotlight is on the role of political elites and economic agents especially the investors included in the vague notion of markets and their strategies to stabilize or destabilize countries from North America to the Eurozone Regrettably the actual and potential role of civil society is hardly mentioned in public debate Yet it is exactly within civil society that important responses to the crisis may emerge It is within civil society that an alternative paradigm and a fundamental rethinking of conventional wisdom may be fostered Citizens vs Markets is the first book to unpack the transformative role of civil society in a sector in which it has traditionally been less

proactive in order to reflect on possible forms of social transformation that are not merely remedial but also constructive in nature This is the most important struggle of our times This book was published as a special issue of the Journal of Civil Society
