Thompson, 2019-10-29 Nothing that God created is the source of our human temptation To the contrary The human body is the crown of God s creation consummated by his declaration that it was good That God's people are unable to view the body without sinning is not an indictment of the body itself but of the immaturity of the post modern evangelical mind We live in a culture whose inhabitants spend billions of dollars a year to see each other naked on internet sites and in pornographic films yet are often uncomfortable changing in front of each other in locker rooms or even being seen in a swimsuit on the beach Could it be that we have so profoundly fused the image of the exposed body with sexual gratification that there is no context left for it to be laid bare without evoking either shame or arousal In That Famous Fig Leaf Chad Thompson explores the spiritual implications of the physical body and surprisingly uncovers a new kind of freedom from sexual addiction along the way Chad

critiques the Christian purity movement for conflating purity with prudery and reveals that changing how we esteem our bodies has the power to heal the hypersexualized body consciousness of our culture The Spirit of Global Health Simon Peng-Keller, Fabian Winiger, Raphael Rauch, 2022 Since the beginning of the World Health Organization many of its staff members regional offices member states and directors general have grappled with the question of what a spiritual dimension of health looks like and how it might enrich the health policies advocated by their organisations Contrary to the wide spread perception that spirituality is primarily related to palliative care and has emerged relatively recently within the organisation this study shows that its history is considerably longer and more complex and has been closely connected to the WHO s ethical aspirations its quest for more holistic and equitable healthcare and its struggle with the colonial legacy of international health organisations While such ideals and struggles silently motivated many of the key actors and policies such as the provision of universal primary healthcare which for decades have embodied the organisation s loftiest aspirations the WHO s official relationship with spirituality advanced in fits leaps and setbacks At times creative and interdisciplinary at others deeply political this process was marked by cycles of institutional forgetting and remembering Rather than as a triumph of religious lobbyists this book argues the spiritual dimension of health may be better understood as a ghost that has haunted and continues to haunt the WHO as it comes to terms with its mandate of advancing health as a state of complete well being available to all
