Recollections Of The Past:

Recollections of the Past George Sydney Ford,1910 *Recovered Memories* Graham M. Davies,Tim Dalgleish,2003-01-10 The phenomenon of recovered memories has excited much controversy in recent years amongst professionals with extreme positions being held either all such memories are by definition false or any such claim is an attempt to deny the victims of abuse their rights to confront their abusers In this refreshing new approach to the problem Graham Davies and Tim Dalgleish have assembled leading figures from both sides of the debate to provide a balanced overview of empirical evidence as well as evidence from clinical practice *Recovered Memories* Seeking the middle ground unlike most other writing on the topic eschews extreme positions It provides clinicians with findings from the latest research to enhance their understanding of memory and presents pure researchers with a range of experiences encountered in clinical practice for which they presently have few explanations Topics include the impact on family and community members the latest findings on implanted memories and discussion of clinical guidelines for therapeutic practice to avoid potential influence on memory Having weighed the evidence a framework is offered in which true and false recovered memories are seen as the inevitable compliment of true and false continuous memories This important new collection should not be missed by anyone with an interest in memory whether engaged in a clinical legal child protection family welfare or experimental research capacity It is the most authoritative and comprehensive review of the evidence on both sides available to date

Myths and Memories of the Black Death Ben Dodds,2021-12-11 This book explores modern representations of the Black Death a medieval pandemic The concept of cultural memory is used to examine the ways in which journalists writers of fiction scholars and others referred to described and explained the Black Death from around 1800 onwards The distant medieval past was often used to make sense of aspects of the present from the cholera pandemics of the nineteenth century to the climate crisis of the early twenty first century A series of overlapping myths related to the Black Death emerged based only in part on historical evidence Cultural memory circulates in a variety of media from the scholarly article to the video game and online video clip and the connections and differences between mediated representations of the Black Death are considered The Black Death is one of the most well known aspects of the medieval world and this study of its associated memories and myths reveals the depth and complexity of interactions between the distant and recent past **Recollections**

of the Past Abner Chase,1846 **False and Distorted Memories** Robert A. Nash,James Ost,2016-10-04 Our memories shape how we think about the past how we plan for the future and how we think about ourselves Yet our memories are also constantly being reinvented we often remember our experiences differently from how they truly happened and can even remember experiences that never happened at all *False and Distorted Memories* provides an overview of recent and ongoing developments in the science of false memory World leading researchers unpick questions about flawed recollections discussing issues as varied as the reliability of highly emotional memories why we sometimes begin to remember fictional

experiences that we have deliberately fabricated and what happens when we stop believing our memories Each chapter demonstrates how memory science has furthered our understanding of these important questions by exploring theoretical ideas and psychological research methods that underpin their investigations Edited by Robert Nash and James Ost this volume offers an international and up to date perspective on false and distorted memories The volume also draws attention to the broad range of real life contexts in which such distortions might arise and their potential consequences False and Distorted Memories illustrates the ease with which memory can be contaminated and the power of the resulting memory errors providing an integral text for researchers and students interested in the psychology of memory **Memories of**

Asaph Karl N. Jacobson, 2017-06-15 Although the Psalms of Asaph Pss 50 73 83 contain a concentration of historical referents unparalleled in the Psalter they have rarely attracted sustained historical interest Karl N Jacobson identifies these psalms as containing cultic historiography historical narratives written for recitation in worship and explores them through mnemohistory attending to how the past is remembered and to the rhetorical function of recitation in the cultic setting Jacobson describes mnemohistory at the intersection of memory and history explores the singularity of the rhetorical and formal aspects of remembrance in the Asaph material and discusses residual mnemohistory material that is not intentionally called to remembrance Jacobson shows that Asaph remembers the past as a movement from henotheism to a more orthodox form of Yahwism as the core memory that informs a new historical situation for worship participants By describing the way Asaph remembers Jacobson highlights symbolic and individualized elements of the psalms mnemohistorical work that earlier formal critical approaches failed to recognize Dictionary of Anonymous and Pseudonymous English Literature: Q-S Samuel Halkett, John Laing, 1929 Recollection in the Republics Imogen Peck, 2021 Recollection in the Republics provides the first comprehensive study of the ways Britain's Civil Wars were remembered in the decade between the regicide and the restoration **Remembering Conquest** Omar Valerio-Jiménez, 2024-04-30 This book analyzes the ways collective

memories of the US Mexico War have shaped Mexican Americans civil rights struggles over several generations As the first Latinx people incorporated into the nation Mexican Americans were offered US citizenship by the Treaty of Guadalupe Hidalgo which ended the war Because the 1790 Naturalization Act declared whites solely eligible for citizenship the treaty pronounced Mexican Americans to be legally white While their incorporation as citizens appeared as progress towards racial justice and the electorate's diversification their second class citizenship demonstrated a retrenchment in racial progress Over several generations civil rights activists summoned conquest memories to link Mexican Americans poverty electoral disenfranchisement low educational attainment and health disparities to structural and institutional inequalities resulting from racial retrenchments Activists also recalled the treaty's citizenship guarantees to push for property rights protection from vigilante attacks and educational reform Omar Valerio Jim nez addresses the politics of memory by exploring how succeeding generations reinforced or modified earlier memories of conquest according to their contemporary social and

political contexts The book also examines collective memories in the US and Mexico to illustrate transnational influences on Mexican Americans and to demonstrate how community and national memories can be used strategically to advance political agendas

Tourism and Memories of Home Sabine Marschall,2017-02-03 This book investigates home and homeland as destinations of touristic journeys and adds to recent scholarly interest in the intersection between tourism and migration It covers the temporary visits and journeys in search of home and homelands by migrants displaced people exiles and diasporic communities in a wide range of different geographical and historical contexts Personal and collective forms of memory are shown to play a key role in the motivation for and experience of such journeys The volume contributes to the investigation of the tourism memory nexus as it conceptualizes memory as underpinning touristic mobility experience and performativity Based on ethnographic case studies and other types of qualitative empirical research the chapters of this book foreground individual touristic experiences emotions memories perceptions the search for identity and a sense of belonging The book will be of interest to students and researchers in the fields of tourism heritage anthropology identity studies memory studies and migration diaspora studies

Japan's Contested War Memories Philip A. Seaton,2007-03-12 Japan s Contested War Memories is an important and significant book that explores the struggles within contemporary Japanese society to come to terms with Second World War history Focusing particularly on 1972 onwards the period starts with the normalization of relations with China and the return of Okinawa to Japan in 1972 and ends with the sixtieth anniversary commemorations Analyzing the variety of ways in which the Japanese people narrate contest and interpret the past the book is also a major critique of the way the subject has been treated in much of the English language Philip Seaton concludes that war history in Japan today is more divisive and widely argued over than in any of the other major Second World War combatant nations Providing a sharp contrast to the many orthodox statements about Japanese ignorance amnesia and denial about the war this is an engaging and illuminating study that will appeal to scholars and students of Japanese history politics cultural studies society and memory theory

Politics of Time Leszek Koczanowicz,2008-08-01 What has really happened in Poland since the election of 2005 After such spectacular events as the practice of lustration and the questioning of solidarity with the European Union one has to ask what is the nature of this newly emerging society As with many of the recent developments in former communist countries that seem to be mysterious and irrational the situation and ensuing problems are complex and the answers neither trivial nor easy This book by the distinguished Polish philosopher addresses these complexities through the role of the communist past in post communist Poland It describes the events that led to the collapse of the Solidarity program and the growing influence of the nationalistic and religious parties in the government The author investigates the nature of social and political temporality and develops a theoretical framework that allows him to apply his conclusions not only to Poland but also to other formerly communist countries

Interpreting Cassirer Simon Truwant,2021-04 This rich collection of essays

addresses all the key aspects of Cassirer's multi-faceted philosophical thought *Simultaneity and Delay* Jay Lampert, 2012-02-09 Through original speculations on the surprisingly complementary concepts of simultaneity and delay and new interpretations of the great philosophers of time this book proposes an innovative theory of staggered time In the early 20th Century Bergson and Husserl following Einstein made Simultaneity what it means for events to occur at the same time a central motif in philosophy In the late 20th Century Derrida and Deleuze instead emphasized Delay events staggered over distant times This struggle between convergent and staggered time also plays out in 20th Century aesthetics especially music politics and the sciences Despite their importance in the history of philosophy this is the first book to comprehensively examine the concepts of simultaneity and delay By putting simultaneity and delay into a dialectical relation this book argues that time in general is organized by elastic rhythms Lampert's concepts describe the time structures of such diverse phenomena as atonal music political decision making neuronal delays leaps of memory and the boredom of waiting and simultaneities and delays in everyday experience and behaviour **Moving in the USSR** Pekka Hakamies, 2005-06-30 This book deals with 20th century resettlements in the western areas of the former USSR in particular the territory of Karelia that was ceded by Finland in the WWII Podolia in the Ukraine and the North West periphery of Russia in the Kola peninsula Finns from Karelia emigrated to Finland most of the Jews of Podolia were exterminated by Nazi Germany but the survivors later emigrated to Israel and the sparsely populated territory beyond the Polar circle received the Soviet conquerors of nature which they began to exploit The empty areas were usually settled by planned state recruitment of relocated Soviet citizens but in some cases also by spontaneous movement Thus a Ukrainian took over a Jewish house a Chuvash kolkhoz was dispersed along Finnish khutor houses and youth in the town of Apatity began to prefer their home town in relation to the cities of Russia Everywhere the settlers met new and strange surroundings and they had to construct places and meanings for themselves in their new home and restructure their local identity in relation to their places of origin and current abodes They also had to create images of the former inhabitants and explanations for various strange details they perceived around themselves All articles within this volume are based on extensive field or archive work This research project was funded by the Academy of Finland *Rough Notes*, 1878 A journal devoted to insurance and the industries Recollections, 1844-1909 Henry Clay McDougal, 1911 Day's Collaçon: an Encyclopaedia of Prose Quotations, 1884 **Sport Tourism** Heather J. Gibson, 2013-09-13 The study of sport tourism is on the cusp of moving from a descriptive phase of research into an analytical phase Consequently many academics and graduate students are searching for theories upon which to ground their work This book draws upon theories and concepts from sociology and anthropology the socio-cultural perspective sport and tourism studies and business studies One of the dangers of a new area of study is that the body of knowledge is built on a range of seemingly unrelated studies By grounding work in a theoretical perspective future work can be linked to and contribute to building a cohesive understanding of various aspects of sport tourism This book is an edited collection written

by some of the top scholars working in a particular domain throughout the world providing a compendium of theories and concepts that can be used to frame research on various aspects of sport tourism This volume was previously published as a special issue of the journal Sport in Society
