**Creating Wealth and Poverty in Postsocialist China** Deborah Davis, Feng Wang, 2009 Presents an up to date look at the social processes and consequences of China's rapid economic growth      Sociological Abstracts Leo P. Chall, 2003 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers      **Social Class** Annette Lareau, Dalton Conley, 2008-07-10 Class differences permeate the neighborhoods classrooms and workplaces where we lead our daily lives But little is known about how class really works and its importance is often downplayed or denied In this important new volume leading sociologists systematically examine how social class operates in the United States today

Social Class argues against the view that we are becoming a classless society. The authors show instead the decisive ways social class matters from how long people live to how they raise their children to how they vote. The distinguished contributors to Social Class examine how class works in a variety of domains including politics, health, education, gender, and the family. Michael Hout shows that class membership remains an integral part of identity in the U.S. in two large national surveys: over 97 percent of Americans when prompted identify themselves with a particular class. Dalton Conley identifies an intangible but crucial source of class difference that he calls the opportunity horizon: children form aspirations based on what they have seen is possible. The best predictor of earning a college degree isn't race, income, or even parental occupation; it is rather the level of education that one's parents achieved. Annette Lareau and Elliot Weininger find that parental involvement in the college application process, which significantly contributes to student success, is overwhelmingly a middle-class phenomenon. David Grusky and Kim Weeden introduce a new model for measuring inequality that allows researchers to assess not just the extent of inequality but also whether it is taking on a more polarized, class-based form. John Goldthorpe and Michelle Jackson examine the academic careers of students in three social classes and find that poorly performing students from high-status families do much better in many instances than talented students from less advantaged families. Erik Olin Wright critically assesses the emphasis on individual life chances in many studies of class and calls for a more structural conception of class. In an epilogue, journalists Ray Suarez, Janny Scott, and Roger Hodge reflect on the media's failure to report hardening class lines in the United States, even when images on the nightly news, such as those involving health, crime, or immigration, are profoundly shaped by issues of class. Until now, class scholarship has been highly specialized, with researchers working on only one part of a larger puzzle. Social Class gathers the most current research in one volume and persuasively illustrates that class remains a powerful force in American society.

*Young People, Class and Place* Robert MacDonald, Tracy Shildrick, Shane Blackman, 2013-10-18

Under the weight of apparently growing consumer affluence, globalisation, and post-modern social theory, many have proclaimed the declining significance of social class and place to young people's lives and for social science. Drawing upon new empirically grounded, theoretically innovative studies, this volume begs to differ. It argues that the youth phase provides a privileged vantage point from which to interrogate and think about broader processes of social change and social continuity. These themes are addressed by all the diverse contributions gathered here. The chapters include investigation of the problems of growing up in gang neighbourhoods and young people's use of space for leisure; new patterns of class formation and youth transition in Eastern Europe; the effects of classed labels and identities such as chav and charver in youth culture and schooling; the changing meanings of class and place for young women in changing socio-economic landscapes; new patterns of youth culture and transition among Black young men in East London; and how we think and theorise about change and continuity in youth studies. Together, these new empirical studies and critical theoretical analyses confirm the continuing central importance of class and place in shaping the opportunities

transitions sub cultures and life styles of young people This book was based on a special issue of Journal of Youth Studies
