

Recovered and False Memories

2 sides to the debate:

1. Evidence that memories can be repressed and later recovered. Is it possible for people to have experienced traumatic events, for which they have no conscious recollection for years, then recall them through therapy?
2. Evidence that false memories can be implanted. Can a person have a false memory implanted which becomes as strong as a real memory?

N.B. 10 mark debate questions = very popular on this topic – make sure you describe & discuss BOTH sides of the debate, as well as refer to ethical, theoretical and legal implications of the issue.
